

Rplus AI Expertise

G-Cloud 15 Service Definition Document Dec 2025

Rplus Analytics Overview

Rplus Analytics Solutions Limited is a specialist data and analytics consultancy providing cloud-first data architecture, engineering, analytics, governance, and data science services. This includes robust AI and machine learning capabilities to drive predictive insights and automation. Our expertise spans the full spectrum of modern data platform technologies, enabling organizations to transform their data infrastructure and unlock strategic insights.

We support public and private sector organizations to design, build, migrate, and operate secure, scalable, and cost-effective data platforms. Our approach combines deep technical expertise with a thorough understanding of regulatory compliance, security frameworks, and operational excellence requirements.

With proven experience across AWS, Microsoft Azure, and Google Cloud Platform (GCP), Rplus Analytics delivers tailored solutions that align technology investments with business objectives. Our team of certified professionals brings industry-leading practices to every engagement, ensuring platforms are robust, performant, and future-ready.

Cloud-First Architecture

Multi-cloud expertise across AWS, Azure, and GCP

Data Governance

Comprehensive compliance and security frameworks

Advanced Analytics

Data science and business intelligence solutions

AI Expertise

Machine learning and artificial intelligence implementation

Service Overview

Rplus AI Services deliver intelligent automation and insights across various business functions, leveraging cutting-edge artificial intelligence to transform operations and drive business value. Our comprehensive suite of AI solutions is designed to enhance decision-making, streamline processes, and unlock new opportunities for growth.

Rplus AI Assistant
Intelligent automation for email, custom workflows, and advanced chatbots.

Rplus AI Dashboard
Advanced analytics, SEO reports, click-through rates, reach, and engagement insights.

Rplus AI for Benefits Management
Optimizing employee benefits administration and personalized recommendations.

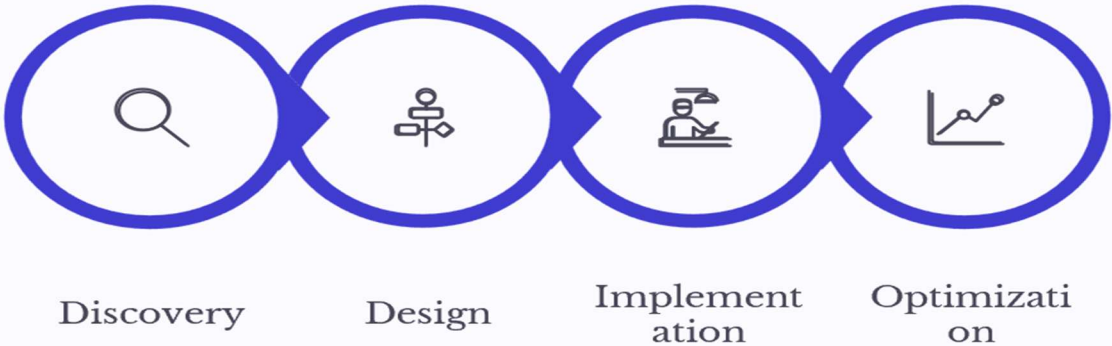

Rplus AI for Legacy Systems
Modernizing and integrating AI capabilities with existing legacy infrastructure.

Rplus AI for Data Engineering/Data Lake
Automating data pipelines, optimizing data lakes, and preparing data for AI models.

Our structured approach ensures successful AI adoption and integration:

This process guides our clients from initial concept to fully operational and continuously optimized AI solutions.

Detailed Capabilities

Rplus AI Services provide in-depth capabilities designed to integrate advanced artificial intelligence into core business functions. Our solutions empower organizations with intelligent automation, real-time analytics, and optimized operations across a variety of domains.

Rplus AI Assistant

An intelligent automation platform that transforms business communications and workflows. The AI Assistant automates email management with smart categorization, priority detection, and automated responses. Custom workflows enable businesses to automate repetitive tasks, approvals, and multi-step processes with intelligent decision-making. Advanced chatbots provide 24/7 customer support, lead qualification, and internal employee assistance with natural language understanding and contextual responses.

Rplus AI for Legacy Systems

A modernization platform that bridges the gap between legacy infrastructure and modern AI capabilities. Intelligent integration layers connect legacy systems with contemporary applications without requiring complete system replacement. AI-powered data extraction and transformation enable legacy data to fuel modern analytics and machine learning models. Automated documentation generation creates comprehensive system maps and API specifications. Gradual modernization pathways reduce risk while delivering immediate value through AI-enhanced functionality.

Rplus AI Dashboard

A comprehensive analytics and performance monitoring platform that provides real-time insights into digital presence and business metrics. The dashboard delivers advanced analytics with customizable KPIs, trend analysis, and predictive forecasting. SEO reporting includes keyword rankings, backlink analysis, and competitive intelligence. Track clicks, reach, and engagement metrics across all digital channels with detailed attribution modeling. Visual dashboards provide actionable insights for marketing optimization, content strategy, and ROI measurement.

Rplus AI for Data Engineering/Data Lake

An advanced data platform that automates data pipeline creation, management, and optimization. Intelligent data ingestion automatically discovers, profiles, and catalogs data sources. AI-driven data quality monitoring detects anomalies, validates schemas, and ensures data integrity. Automated ETL/ELT pipeline generation reduces development time while maintaining best practices. Smart data lake organization with automated partitioning, compression, and lifecycle management optimizes storage costs. ML-ready data preparation includes feature engineering, data labeling, and model training dataset creation.

Rplus AI for Benefits Management

An intelligent benefits administration platform that streamlines employee benefits programs and enhances decision-making. AI-powered recommendations help employees select optimal benefit packages based on personal circumstances, life events, and usage patterns. Automated enrollment processes reduce administrative burden while ensuring compliance. Predictive analytics identify cost-saving opportunities and optimize benefit offerings. Real-time benefits utilization tracking and personalized communication improve employee satisfaction and engagement.

Service Value Proposition

1

Platform Availability

Support for mission-critical data platforms

2

Implementations

Proven track record across sectors

3

Cloud Platforms

Multi-cloud expertise and certification

Why Choose Rplus Analytics

Organizations choose Rplus Analytics for our deep AI expertise, proven delivery methodologies, and commitment to client success. Our specialists bring special AI skills on automation & agents, combined with practical experience delivering complex enterprise projects.

- Technical Excellence: Certified professionals with deep AI expertise and architectural knowledge
- Proven Delivery: Structured methodologies ensuring projects are delivered on time and within budget
- Client Focus: Tailored solutions aligned with specific business objectives and constraints
- Continuous Innovation: Staying current with latest platform capabilities and industry best practices
- Risk Management: Comprehensive testing, validation, and quality assurance throughout delivery

Support Hours

Monday to Friday

9:00 AM to 5:00 PM (UK time)

Extended support hours available for mission-critical services under SLA agreements.

Get Started

Ready to transform your data platform capabilities with expert cloud support services? Rplus Analytics is committed to helping organizations maximize the value through comprehensive implementation, integration, and operational support services.

Initial Consultation

Schedule a discussion to explore your requirements and objectives

Platform Assessment

Comprehensive evaluation of current state and opportunities

Tailored Proposal

Customized service plan aligned with your needs and budget

Service Activation

Rapid onboarding and engagement kickoff

Whether you're planning a new platform implementation, migrating existing systems to the cloud, or seeking to optimize current infrastructure, our team is ready to support your journey. Contact us today to discuss how Rplus Analytics can deliver the expertise and support needed to achieve your data platform objectives.

 **G-Cloud 15 Framework:** This service is available through the UK Government's G-Cloud 15 framework, enabling streamlined procurement for public sector organizations. Our service definition meets all framework requirements and supports compliant, efficient procurement processes.
