

G-Cloud 15 Service Definition Document Dec 2025

Rplus Analytics Overview

Rplus Analytics Solutions Limited is a specialist data and analytics consultancy providing cloud-first data architecture, engineering, analytics, governance, and data science services. This includes robust AI and machine learning capabilities to drive predictive insights and automation. Our expertise spans the full spectrum of modern data platform technologies, enabling organizations to transform their data infrastructure and unlock strategic insights.

We support public and private sector organizations to design, build, migrate, and operate secure, scalable, and cost-effective data platforms. Our approach combines deep technical expertise with a thorough understanding of regulatory compliance, security frameworks, and operational excellence requirements.

With proven experience across AWS, Microsoft Azure, and Google Cloud Platform (GCP), Rplus Analytics delivers tailored solutions that align technology investments with business objectives. Our team of certified professionals brings industry-leading practices to every engagement, ensuring platforms are robust, performant, and future-ready.

Cloud-First Architecture

Multi-cloud expertise across AWS, Azure, and GCP

Data Governance

Comprehensive compliance and security frameworks

Advanced Analytics

Data science and business intelligence solutions

AI Expertise

Machine learning and artificial intelligence implementation

Service Overview

The Cloud Setup service provides comprehensive implementation and configuration services for Informatica Intelligent Data Management Cloud platforms integrated with multi-cloud environments. Rplus Analytics delivers end-to-end setup services ensuring your data integration and management platforms are properly configured, optimized, and ready for production.

Our comprehensive cloud setup approach includes:

- IDMC Platform Implementation: Complete setup and configuration of Informatica IDMC services and components
- Multi-Cloud Integration Configuration: Expert configuration of IDMC integrations with Azure, AWS, GCP, and Cloudera platforms
- Data Integration Pipeline Setup: Configuration of ETL/ELT pipelines, data flows, and integration processes
- Azure Integration Setup: Configuring IDMC connectivity with Azure Data Lake, Azure Synapse, Azure SQL Database, and Azure Databricks
- AWS Integration Setup: Implementing IDMC integration with Amazon S3, Amazon Redshift, AWS Glue, Amazon RDS, and AWS EMR
- GCP Integration Setup: Configuring IDMC integration with BigQuery, Cloud Storage, Cloud SQL, and Dataproc
- Cloudera Integration Setup: Comprehensive setup of IDMC integration with Cloudera Data Platform (CDP) including HDFS, Hive, Impala, and Spark
- Security Configuration: Implementing security controls, access management, and compliance frameworks
- Performance Optimization: Tuning configurations for optimal data processing performance and scalability
- Documentation & Knowledge Transfer: Comprehensive documentation and training for operational teams
- Production Readiness: Validation and testing ensuring platforms are ready for production deployment

Our cloud setup services are tailored to organizational requirements and technical specifications, ensuring Informatica IDMC platforms and their multi-cloud integrations are configured according to best practices and optimized for your specific use cases.

01

Requirements & Planning

Comprehensive requirements gathering and setup planning

03

Testing & Validation

Thorough testing ensuring all components function correctly

02

Configuration & Implementation

IDMC and multi-cloud integration setup and configuration

04

Deployment & Handover

Production deployment with documentation and knowledge transfer

Platform Technologies

Informatica IDMC

Comprehensive data integration, quality, governance, and master data management across cloud and hybrid environments. Full implementation and integration expertise across Azure, AWS, GCP, and Cloudera platforms.

Cloudera

Enterprise data cloud platform for analytics, machine learning, and data engineering at scale. Hybrid and multi-cloud deployment, optimization, and operational support.

Qlik

Powerful business intelligence and data analytics platform enabling self-service visualization and governed data discovery. Integration with enterprise data platforms and cloud services.

Databricks

Unified data analytics platform combining data warehousing and AI capabilities. Lakehouse architecture implementation, optimization, and advanced analytics support.

Detailed Service Description

Implementation & Configuration Services

Rplus Analytics provides comprehensive implementation and configuration services for Informatica IDMC platforms and their multi-cloud integrations. Our setup team ensures platforms are properly configured, integrated, and optimized for production deployment.

- Informatica IDMC platform setup and configuration
- Multi-cloud integration configuration (Azure, AWS, GCP, Cloudera)
- Data integration pipeline implementation
- ETL/ELT process configuration
- Security and access management setup
-

Integration & Optimization

Our cloud setup services include integration configuration and performance optimization ensuring Informatica IDMC works seamlessly with cloud platforms and operates at peak efficiency. Informatica and cloud-certified practitioners ensure best practices are followed throughout implementation.

- Platform integration and data flow configuration
- Performance tuning and optimization
- Security configuration and compliance setup
- Documentation and knowledge transfer
- Production readiness validation and testing

Service Capabilities

Architecture & Engineering

Design and implementation of secure, scalable cloud and hybrid data platforms optimized for performance and cost-effectiveness. Multi-cloud expertise ensuring vendor neutrality and strategic flexibility.

Data Integration & Migration

Seamless data integration, transformation, and migration services supporting complex enterprise data landscapes. ETL/ELT pipeline development and optimization using modern cloud-native tools.

Governance & Security

Comprehensive data governance frameworks including cataloging, lineage, quality management, and compliance. Integration with existing security and governance infrastructure.

Platform Optimization

Continuous performance tuning, capacity planning, and cost optimization. Regular health checks and recommendations to maximize platform ROI and operational efficiency.

Operational Support

SLA-backed operational support with clearly defined response times. Proactive monitoring, incident management, and problem resolution ensuring platform availability and reliability.

Training & Knowledge Transfer

Comprehensive training programs and documentation enabling internal teams to effectively manage and operate data platforms. Tailored enablement sessions for technical and business users.

Setup Approach & Flexibility

Rplus Analytics provides flexible cloud setup services tailored to organizational requirements and technical specifications. Our implementation approach adapts to project timelines, complexity levels, and integration needs, ensuring successful deployment of Informatica IDMC across multi-cloud environments.

IDMC Platform Setup

Complete Informatica IDMC implementation including data integration, data quality, master data management, and data governance services. Configuration following Informatica best practices with security and performance optimization.

Multi-Cloud Integration Setup

Expert implementation of IDMC integrations with Azure, AWS, GCP, and Cloudera platforms. Configuring connectivity, data flows, and ensuring seamless data integration across cloud environments.

Data Pipeline Configuration

Implementation of ETL/ELT pipelines, data quality workflows, and transformation processes. Configuring data integration processes and establishing data governance frameworks.

Our cloud setup services follow a structured methodology: requirements gathering and planning, infrastructure provisioning, IDMC platform configuration, multi-cloud integration implementation, data pipeline setup, security configuration, performance optimization, testing and validation, and production deployment with comprehensive documentation and knowledge transfer.

Setup coverage spans the entire data integration stack from Informatica IDMC platform through cloud integrations to data pipelines and governance frameworks. Our team configures IDMC integrations with Azure, AWS, GCP, and Cloudera according to best practices. We ensure all components are properly integrated, secured, optimized, and ready for production operations with thorough documentation and training for operational teams.

Service Value Proposition

1

Platform Availability

Support for mission-critical data platforms

2

Implementations

Proven track record across sectors

3

Cloud Platforms

Multi-cloud expertise and certification

Why Choose Rplus Analytics

Organizations choose Rplus Analytics for our deep technical expertise, proven delivery methodologies, and commitment to client success. Our specialists bring certified skills across all major cloud platforms and data technologies, combined with practical experience delivering complex enterprise projects.

- Technical Excellence: Certified professionals with deep platform expertise and architectural knowledge
- Proven Delivery: Structured methodologies ensuring projects are delivered on time and within budget
- Client Focus: Tailored solutions aligned with specific business objectives and constraints
- Continuous Innovation: Staying current with latest platform capabilities and industry best practices
- Risk Management: Comprehensive testing, validation, and quality assurance throughout delivery

Contact Details

Supplier

Rplus Analytics Solutions Limited

Specialist data and analytics consultancy delivering cloud-first solutions for enterprise and public sector organizations.

Support Hours

Monday to Friday

9:00 AM to 5:00 PM (UK time)

Extended support hours available for mission-critical services under SLA agreements.

Get Started

Ready to transform your data platform capabilities with expert cloud support services? Rplus Analytics is committed to helping organizations maximize the value of their Cloud Setup services through comprehensive implementation, integration, and operational support services.

Initial Consultation

Schedule a discussion to explore your requirements and objectives

Platform Assessment

Comprehensive evaluation of current state and opportunities

Tailored Proposal

Customized service plan aligned with your needs and budget

Service Activation

Rapid onboarding and engagement kickoff

Whether you're planning a new platform implementation, migrating existing systems to the cloud, or seeking to optimize current infrastructure, our team is ready to support your journey. Contact us today to discuss how Rplus Analytics can deliver the expertise and support needed to achieve your data platform objectives.

G-Cloud 15 Framework: This service is available through the UK Government's G-Cloud 15 framework, enabling streamlined procurement for public sector organizations. Our service definition meets all framework requirements and supports compliant, efficient procurement processes.
