

G-Cloud 15 Service Definition Document Dec 2025

Rplus Analytics Overview

Rplus Analytics Solutions Limited is a specialist data and analytics consultancy providing cloud-first data architecture, engineering, analytics, governance, and data science services. This includes robust AI and machine learning capabilities to drive predictive insights and automation. Our expertise spans the full spectrum of modern data platform technologies, enabling organizations to transform their data infrastructure and unlock strategic insights.

We support public and private sector organizations to design, build, migrate, and operate secure, scalable, and cost-effective data platforms. Our approach combines deep technical expertise with a thorough understanding of regulatory compliance, security frameworks, and operational excellence requirements.

With proven experience across AWS, Microsoft Azure, and Google Cloud Platform (GCP), Rplus Analytics delivers tailored solutions that align technology investments with business objectives. Our team of certified professionals brings industry-leading practices to every engagement, ensuring platforms are robust, performant, and future-ready.

Cloud-First Architecture

Multi-cloud expertise across AWS, Azure, and GCP

Data Governance

Comprehensive compliance and security frameworks

Advanced Analytics

Data science and business intelligence solutions

AI Expertise

Machine learning and artificial intelligence implementation

Service Overview

Our comprehensive Cloud Agnostic Intelligent Platform service includes:

- Multi-Cloud Integration Configuration: Expert configuration of IDMC integrations with Azure, AWS, GCP, and Cloudera platforms
- Data Integration Pipeline Setup: Configuration of ETL/ELT pipelines, data flows, and integration processes
- Azure Integration Setup: Configuring IDMC connectivity with Azure Data Lake, Azure Synapse, Azure SQL Database, and Azure Databricks
- AWS Integration Setup: Implementing IDMC integration with Amazon S3, Amazon Redshift, AWS Glue, Amazon RDS, and AWS EMR
- GCP Integration Setup: Configuring IDMC integration with BigQuery, Cloud Storage, Cloud SQL, and Dataproc
- IDMC Platform Or Talend Implementation: Complete setup and configuration of Informatica IDMC / Talend services and components
- Snowflake/Databricks/ Cloudera Integration Setup: Comprehensive setup of IDMC integration with Snowflake/Databricks/ Cloudera Data Platform including HDFS, Hive, Impala, and Spark
- Security Configuration: Implementing security controls, access management, and compliance frameworks
- Performance Optimization: Tuning configurations for optimal data processing performance and scalability
- Documentation & Knowledge Transfer: Comprehensive documentation and training for operational teams
- Production Readiness: Validation and testing ensuring platforms are ready for production deployment

Our multi cloud support services are tailored to organizational requirements and criticality levels, ensuring platforms and their multi-cloud integrations receive the appropriate level of monitoring and support.

01

Assessment & Planning

Comprehensive evaluation of current state and future requirements

02

Design & Architecture

Cloud-optimized platform design aligned with business goals

03

Implementation & Integration

Expert deployment and seamless integration with existing systems

04

Optimization & Support

Ongoing performance tuning and operational excellence

Detailed Service Description

Implementation & Integration Services

Rplus Analytics delivers end-to-end cloud support services covering planning, design, implementation, integration, migration, and operational support. Our implementation methodology ensures seamless deployment of Informatica IDMC/Talend, Cloudera, Qlik, Snowflake, Databricks platforms with minimal disruption to existing operations.

- Integration across Azure, AWS, GCP along with Pn-Premise
- Cloud and hybrid data platform architecture and engineering
- Data integration, migration, transformation, and governance
- Platform customization, tuning, and optimization

• Integration & Optimization

Our Cloud Agnostic Intelligent Platform services include integration configuration and performance optimization ensuring Informatica IDMC works seamlessly with cloud platforms and operates at peak efficiency. Informatica and cloud-certified practitioners ensure best practices are followed throughout implementation.

- Platform integration and data flow configuration
 - Performance tuning and optimization
 - Security configuration and compliance setup
 - Documentation and knowledge transfer
- Production readiness validation and testing

Service Capabilities

Architecture & Engineering

Design and implementation of secure, scalable cloud and hybrid data platforms optimized for performance and cost-effectiveness. Multi-cloud expertise ensuring vendor neutrality and strategic flexibility.

Data Integration & Migration

Seamless data integration, transformation, and migration services supporting complex enterprise data landscapes. ETL/ELT pipeline development and optimization using modern cloud-native tools.

Governance & Security

Comprehensive data governance frameworks including cataloging, lineage, quality management, and compliance. Integration with existing security and governance infrastructure.

Platform Optimization

Continuous performance tuning, capacity planning, and cost optimization. Regular health checks and recommendations to maximize platform ROI and operational efficiency.

Operational Support

SLA-backed operational support with clearly defined response times. Proactive monitoring, incident management, and problem resolution ensuring platform availability and reliability.

Training & Knowledge Transfer

Comprehensive training programs and documentation enabling internal teams to effectively manage and operate data platforms. Tailored enablement sessions for technical and business users.

Deployment Models & Flexibility

Rplus Analytics provides flexible Cloud Agnostic Intelligent Platform services tailored to organizational requirements and technical specifications. Our implementation approach adapts to project timelines, complexity levels, and integration needs, ensuring successful deployment across multi-cloud environments.

Data Platform Setup

Complete Data Platform implementation including data integration, data quality, master data management, and data governance services. Configuration following best practices with security and performance optimization.

Multi-Cloud Integration Setup

Expert implementation across multiple clouds like Azure, AWS, GCP & Oracle with integrations for Snowflake, Databricks, IDMC, Qlik, Cloudera platforms. Configuring connectivity, data flows, and ensuring seamless data integration across cloud environments.

Data Pipeline Configuration

Implementation of ETL/ELT pipelines, data quality workflows, and transformation processes. Configuring data integration processes and establishing data governance frameworks.

The service supports integration with existing governance and catalogue services, enabling organizations to maintain consistency across their data estate. We align with established IT service management practices, change control processes, and security frameworks to ensure smooth collaboration with internal teams.

Our approach recognizes the unique requirements of public sector organizations, including compliance with government security classifications, data sovereignty requirements, and procurement regulations. We bring proven experience working within these frameworks while delivering innovative cloud solutions.

Service Value Proposition

1

Platform Availability

Support for mission-critical data platforms

2

Implementations

Proven track record across sectors

3

Cloud Platforms

Multi-cloud expertise and certification

Why Choose Rplus Analytics

Organizations choose Rplus Analytics for our deep technical expertise, proven delivery methodologies, and commitment to client success. Our specialists bring certified skills across all major cloud platforms and data technologies, combined with practical experience delivering complex enterprise projects.

- Technical Excellence: Certified professionals with deep platform expertise and architectural knowledge
- Proven Delivery: Structured methodologies ensuring projects are delivered on time and within budget
- Client Focus: Tailored solutions aligned with specific business objectives and constraints
- Continuous Innovation: Staying current with latest platform capabilities and industry best practices
- Risk Management: Comprehensive testing, validation, and quality assurance throughout delivery

Contact Details

Supplier

Rplus Analytics Solutions Limited

Specialist data and analytics consultancy delivering cloud-first solutions for enterprise and public sector organizations.

Primary Contact

Lavanya KV

Email: partners@rplusanalytics.com

Telephone: 07504 605955

Support Hours

Monday to Friday

9:00 AM to 5:00 PM (UK time)

Extended support hours available for mission-critical services under SLA agreements.

Get Started

Ready to transform your data platform capabilities with expert cloud support services? Rplus Analytics is committed to helping organizations maximize the value through comprehensive implementation, integration, and operational support services.

Initial Consultation

Schedule a discussion to explore your requirements and objectives

Platform Assessment

Comprehensive evaluation of current state and opportunities

Tailored Proposal

Customized service plan aligned with your needs and budget

Service Activation

Rapid onboarding and engagement kickoff

Whether you're planning a new platform implementation, migrating existing systems to the cloud, or seeking to optimize current infrastructure, our team is ready to support your journey. Contact us today to discuss how Rplus Analytics can deliver the expertise and support needed to achieve your data platform objectives.

 **G-Cloud 15 Framework:** This service is available through the UK Government's G-Cloud 15 framework, enabling streamlined procurement for public sector organizations. Our service definition meets all framework requirements and supports compliant, efficient procurement processes.
