

EQL – Health InfoShare PRICING

EQL believes in truly transparent and fair pricing for all our customers particularly within the public sector. The structure of our G-Cloud pricing consists of our per transaction pricing, tiered based on the volume of the transactions.

Reiterating our commitment to transparent and fair pricing the following considerations apply on all our pricing models

- No licence fees
- Transparent set up/onboarding fees only dependent on configuration complexities

Onboarding fees

EQL designed and developed Health InfoShare to be agile and easily integrated into our public sector Customers. Customers can customise the questions to best suit the part of a functional/health and disability Assessment that they are trying to get information on from the user. They are also able to select the integration that best suits their business operational processes and technical support.

The main routes a customer can instruct Health InfoShare are:

- Registration Landing Page
- Customer Admin Portal - Registration
- API Integration

The main routes a customer can receive completed InfoShare data are:

- Admin Portal
- API Integration

For standalone implementation there are set up/integration fees of £1,000 a day. For Integrated implementations, there may be a cost incurred from the 3rd party system that you wish to integrate with.

Service Fees

Per transaction

- User enters and completes the interaction fully. We take on the adoption risk allowing you to reach as many users as possible.

Billed monthly in arrears.
