PRICING AND SAVINGS OF USING aQ FOR DATA COLLECTION

aQ is a medical-grade research platform which contains unique features to facilitate bespoke and customisable data collection for broad health and social care applications. aQ improves the quality of research and makes data collection more straightforward and cost-effective. It can be used for purposes ranging from PROMS, small and large studies, drug and new therapy development and continuous monitoring. Surveys can be one-off, multiple or ongoing part of a long term engagement programme and aQ's advanced scheduling capability allows you to collect the data that you need when you need to collect it. aQ enables efficiencies within research processes and aids in assessing research participant feedback and outcomes both individually and at scale.

aQ STANDARD CAPABILITIES

- A digitally inclusive platform with Mobile App and Web Compatibility.
- AQ can manage very simple or very detailed questionnaires with complex algorithms.
- AQ's innovative branching logic allows you to build highly customised questionnaires with multiple question pathways based on preceding answers.
- A user-friendly, intuitive interface which has been co-designed with patients/users.
- The ability to use advanced scheduling to send particular questions to specific cohorts on a chosen date or event.
- The AQ dashboard displays data collection, progress and insights.

FLEXIBLE PRICING FOR YOUR NEEDS

Pricing for aQ is based on the complexity and length of the research project and the anticipated volume of questionnaires and responses. Costs for a standard research project would generally be in the region of £20,000 to £30,000 but can be flexed for smaller or more limited studies.

Where standard questionnaires are required, we can source and pre-load these for you or help with the creation of more bespoke surveys.

We can provide tailored quotations based on specific requirements, additional bespoke functionality and the size of the deployment. Please provide the details below and send to info@itechohealth.com

Organisation Name:

Contact person details:

Technical details:

1. Would aQ be used to support a research project or trial? If yes please give a brief overview of the research project (e.g. project name, funding status/name of funder, start date/end date, names of other collaborating organisations etc)

2. Would aQ be used to support a routine service? If yes please give a brief overview of the service.

3. Approximate total number of participants (or patients) who would be using aQ and information around any sub-groups or cohorts.

4. Number and names (if known) of the questionnaires (surveys) which you plan to upload to aQ.

5. Approximate total number of completed questionnaire responses you expect per annually (or for this deployment if shorter).

6. Approximate total number of staff (for example clinicians or researchers) whom will be using the staff application/portal?

7. Additional bespoke functionality for the participant user application, staff application and dashboard (not listed in the Service Definition Document).

Please send this information and any queries to info@itechohealth.com and we will reply with pricing options, specific to your needs. Thank you.
