AI Delivery

Introduction to Squarcle

Squarcle is a digitally native supply chain consultancy, dedicated to driving transformative results for our clients. As a leader in the field, we leverage cutting-edge data science and digital solutions to optimise supply chain operations and propel businesses towards success. At Squarcle, we believe that every challenge holds an opportunity for transformation.

With a strong focus on digital innovation, data science, and collaborative problem-solving, we drive success by designing and executing tailored strategies that optimise supply chain efficiency, enhance operational performance, and fuel sustainable growth.

Supported by data science and a suite of agentic AI tools, we bring a differentiated approach, harnessing innovation and insights to enhance operational performance and outcomes. Underpinned by deep supply chain experience, our unique blend of military, industrial, and consulting expertise enables us to work in partnership to understand our clients' unique needs, navigate complexities, and co-create innovative solutions to drive tangible and lasting results.

Why Squarcle?

Deep Specialist Insight

With decades of military and industry knowledge; our approach is based on firsthand delivery experience

Supply Chain DNA

We possess deep procurement and supply chain expertise, aligned to SCOR and tailored to complex environments

Data & AI at our core

We have focused on leveraging the power of data since day one, driving insight to deliver sustainable impact

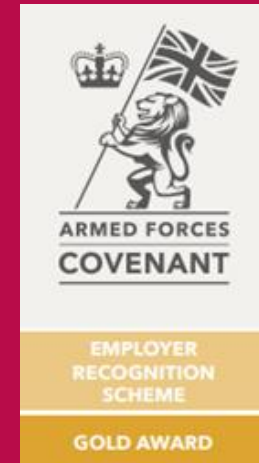

Independence

We are founder led, unencumbered by external constraints, enabling us to work without restriction

Delivery Focused

We are collaborative implementation partners, delivering impact and sustainability for clients

AI Delivery

Service description

Squarcle provides end-to-end AI delivery services that design, build and deploy production-ready AI solutions. Leveraging machine learning, generative-AI and advanced analytics techniques, we transform data into scalable AI capabilities. Our approach spans problem definition, data readiness, model development and deployment, ensuring solutions are robust, ethical and aligned to organisational objectives.

Service Features and Benefits

Service features

- End-to-end AI delivery from discovery to production deployment
- Custom machine learning and generative AI model development
- Data preparation, feature engineering, and model evaluation pipelines
- Secure cloud-based deployment and integration with existing systems
- Responsible AI design covering ethics, governance, and model transparency
- MLOps implementation for monitoring, retraining, and performance management
- Scalable architectures supporting pilots through enterprise-wide AI adoption
- Knowledge transfer and upskilling for sustainable in-house AI capability

Service benefits

- Accelerates delivery of production-ready AI solutions
- Reduces risk through robust governance and ethical AI practices
- Improves decision-making through intelligent automation and advanced analytics
- Enables scalable AI adoption aligned to organisational objectives
- Lowers long-term costs through reusable models and platforms
- Increases operational efficiency by automating complex, data-driven processes
- Enhances transparency and trust in AI-driven outcomes
- Builds internal capability through skills transfer and collaborative delivery
