Digital Supply Chain Design and Optimisation

Introduction to Squarcle

Squarcle is a digitally native supply chain consultancy, dedicated to driving transformative results for our clients. As a leader in the field, we leverage cutting-edge data science and digital solutions to optimise supply chain operations and propel businesses towards success. At Squarcle, we believe that every challenge holds an opportunity for transformation.

With a strong focus on digital innovation, data science, and collaborative problem-solving, we drive success by designing and executing tailored strategies that optimise supply chain efficiency, enhance operational performance, and fuel sustainable growth.

Supported by data science and a suite of agentic AI tools, we bring a differentiated approach, harnessing innovation and insights to enhance operational performance and outcomes. Underpinned by deep supply chain experience, our unique blend of military, industrial, and consulting expertise enables us to work in partnership to understand our clients' unique needs, navigate complexities, and co-create innovative solutions to drive tangible and lasting results.

Why Squarcle?

Deep Specialist Insight

With decades of military and industry knowledge; our approach is based on firsthand delivery experience

Supply Chain DNA

We possess deep procurement and supply chain expertise, aligned to SCOR and tailored to complex environments

Data & AI at our core

We have focused on leveraging the power of data since day one, driving insight to deliver sustainable impact

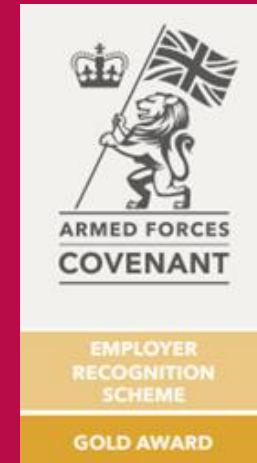

Independence

We are founder led, unencumbered by external constraints, enabling us to work without restriction

Delivery Focused

We are collaborative implementation partners, delivering impact and sustainability for clients

Digital Supply Chain Design and Optimisation

Service description

Our digital supply chain design methodology practically, quickly, and intelligently assesses the current state of your supply chain. From improving inventory management, demand forecasting, supplier management, inventory visibility, and identifying optimal supply chain network designs, we leverage data science and AI methodologies to achieve the best results.

Service Features and Benefits

Service features

- Comprehensive assessment of supply chain capabilities
- Data driven for optimised supply chain planning and performance
- Inventory visibility enhancement enabled by AI
- Data science led supply chain strategy development

Service benefits

- Cost modelling that ensures cost control achieved alongside resilience
- Operating Cost reduction through analysis of high spend areas
- Supply Chain visibility enabling optimisation of functions and costs
- Modelling that facilitates 'what-if' analysis and delivery of outcomes
- Logistics planning that reduces supply chain risk and increases resilience
- Supply Chain diagnostics that identify areas for improvement and investment
- Inventory optimisation that complies with ISO9001
- Optimised warehouse design leading to cost and resilience benefits
- Streamlined and effective supplier relationship and improved procurement processes
- Data driven insight and enhanced decision making
