About Us

Our *Journey*

Founded by Tim Passingham in 2015, Cambridge Management Consulting was started to bring years of experience in digital technology to the startup and scale-up community of Cambridge, UK.

Quickly expanding our offices to London, Paris, and other business hubs, we now have over **200 experts in 26 countries/territories** and work with governments and enterprises internationally.

We firmly believe that there is no substitute for **real-world experience**. That's why we don't employ consultants: everyone in our team has years of senior experience in their field and a **track record** of delivering transformation as well as having an impact in the enterprise or government roles in which they have served.

*Our purpose is to help our clients
have a better impact on the world*

**“The realisation of
multi-million savings
across the programme-
managed projects.”**

—Liberty Global / Cartesian Procurement Programme

Our *Impact*

**At least 1% of our time,
1% of our profits & 1% of our Equity**

to help our chosen charities.

The focus of our charity work is based around our four 'C's':

- Children & Young People
- Cancer Support & Research
- Conservation, Environment & Sustainability
- Communications in poor & rural areas

We also signed the UK Armed Forces Covenant to support UK veterans, who we actively employ and support.

Cambridge **mc²**
Management Consulting

**We have raised over £1
million for our charities
since we were founded.**

"We've been delighted with the partnership with Cambridge Management Consulting who have kindly supported Sands both financially and with pro bono assistance, for example building us a new website for the National Bereavement Care Pathway which is being rolled out across the NHS in the UK. We are deeply grateful for their support in our mission to reduce the number of babies dying and ensure that, when a baby does die, anyone affected gets the support and care they need"

—Clea Harmer, CEO, Sands

"The Due Diligence team were fast and delivered what we needed to help shape our strategic planning. We liked just contracting with the Cambridge MC for both the Commercial and Technical Due Diligence knowing that they could do both - so we only had to have one contract plus got a better service for a lower price."

Digital Transformation

How we can *help*

We can bring key skills and experience to positively impact the performance of portfolio companies. We work collaboratively with your teams and support a wide range of functions from maximising and modernising your digital resources, increasing digital leadership and skills in your workforce, and strengthening cyber resilience.

“**Digital transformation is a business discipline or a company philosophy, not a project**”
*Katherine Kostereva,
CEO – bpm’online*

Digital Engineering

Transform your infrastructure with digital engineering services that improve your data quality and speed up deployment lifecycles.

Risk & Cyber Security

A range of services that reduce breach risk, ensure compliance, and build resilience into your digital transformation programme.

Digital IT Operations

Design, procure, and implement digital services that reduce costs, boost efficiency, improve service delivery, and accelerate response times.

AI & Machine Learning

Unlock value with AI and Machine Learning (ML) services to automate decisions, enhance customer experience, and create new revenue streams.

Digital Workplace

Enabling seamless productivity and communication across locations with innovative technologies that enhance engagement and boost productivity.

Digital Leadership & Innovation

Our advisory services deliver future-proofed roadmaps, optimised investments, and accelerated technology adoption across your organisation.

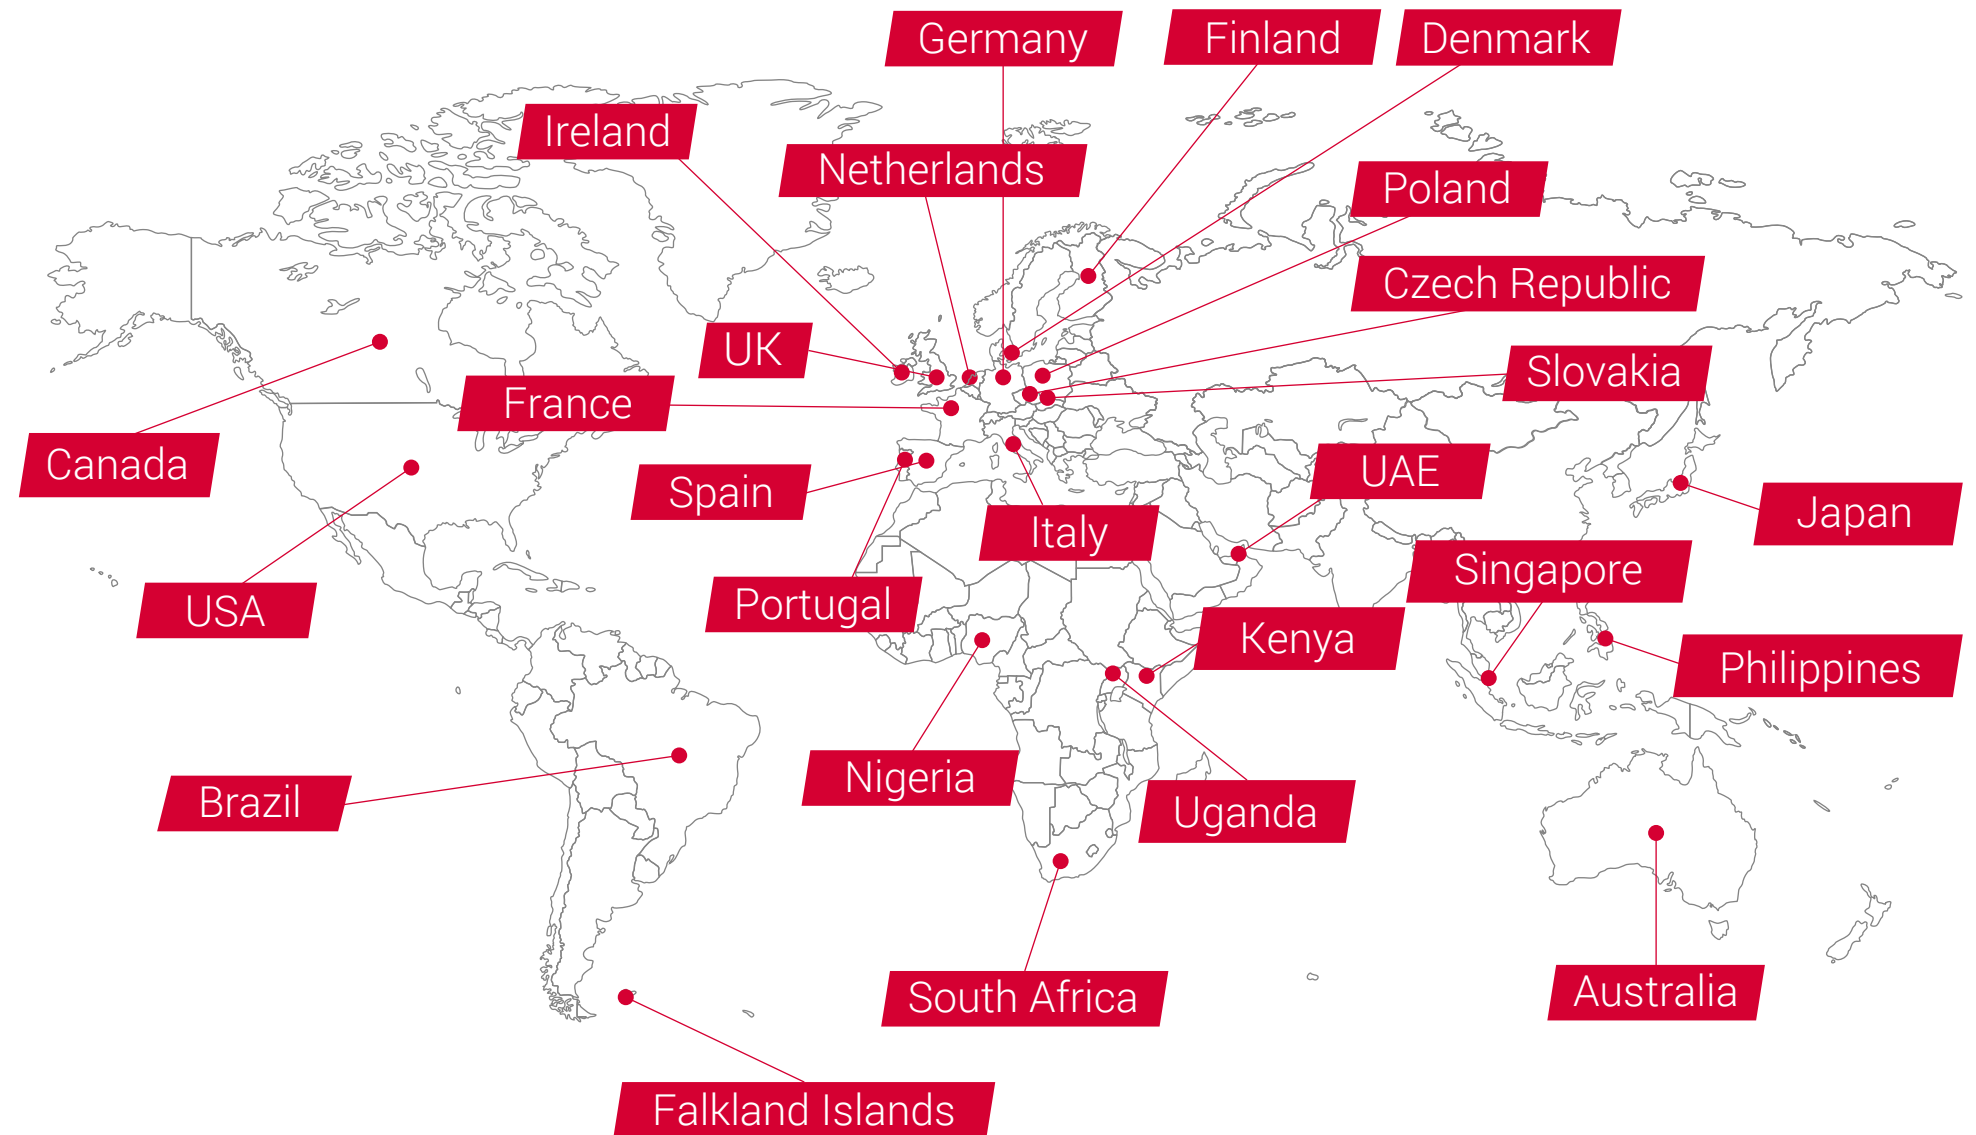

Data Science

We leverage advanced data analytics and cutting-edge technologies to enhance decision-making, optimise operations, and drive growth.

Global Team

“They showed a genuine interest and concern for our business and investments, proactively going beyond the scoped engagement in a way we don’t see with other advisory firms.”
