Cloud Consulting Services

Our approach towards Assess, Plan, and Adopt helps us to deliver an effective cloud consulting service. RSV Solutions's Industry-Specific cloud consulting services can help organizations to realize maximized value from their investment.

Making a decision to make a move to the cloud is a challenging task – especially when the clients has the responsibility of data security and availability for organization's constituencies.

We offer a full range of packaged cloud services that support organizations of all sizes to cut down traditional infrastructure costs, mitigate software installation activities and reap maximum time to focus on core business.

Our Cloud Consulting Services include:

- Assessment and Strategy Development
- Strategic Solutions
- Migration
- Cloud Resource Optimisation
- Cloud Service Delivery Planning
- Proof of Concept
- Compliance and Security

Assessment and Strategy Development

We help to develop a scalable strategy and roadmap aligned with your business's needs. Your strategy will account for data security and integrity, prevent downtime, offer cost savings, and include staff training.

Strategic Solutions

Transformation should start at the beginning of your move to the cloud, but we've found that it can start anywhere between developing a business case for a digital workplace solution and being in the throes of a roll-out that hasn't been executed efficiently. Our team of experts is ready to meet you where you are to help develop and implement the right digital workplace solution for your organisation.

Migration

Data Migration

Our cloud service professionals can help organizations migrate all their mission critical data to the cloud and make sure that data is highly secure and correctly placed.

Infrastructure Migration

RSV Solutions provides services for migration of infrastructure to cloud through its cloud service specialists.

Platform Migration

Our cloud service specialists possess vast experience in migrating applications on several leading platforms.

Application Migration

Applications to Cloud is separated. RSV Solutions's possess a tested framework for precise, predictable, and quick Migration of Applications to Cloud.

Cloud Resource Optimisation

Once in the cloud, our optimisation specialist will identify the most cost-effective way to leverage cloud services. Your enterprise will enjoy cost savings and centralised management—without limiting service availability or accessibility.

Cloud Service Delivery Planning

Our Delivery and Release management service brings experiences from successful complex, co-sourced, multi-supplier and large-scale cloud projects. Our practical agile delivery management approach is adapted to the organisation, budget, people and technology in place. Release planning and scheduling provides predictability and control, quality assurance of deliverables and efficient deployment processes.

Proof of Concept

Our Proof of Concept (POC) approach helps our clients to accelerate the Cloud adaption journey by applying the proven methodologies and minimizing any unforeseen risks. Customers usually have many legitimate questions related to technology, cost, agility, scalability, and high availability, etc.

Compliance and Security

The pace of change in cloud is exponentially faster than other technologies. We help you take charge of securing your cloud environment by holistically integrating compliance, governance, security and privacy capabilities into your cloud transformation program.

Cloud Development and Deployment

RSV Solutions's cloud migration and deployment services can help organizations seamlessly migrate their vast historical and sensitive data to the cloud.

Deployment Planning and Evaluation

Our cloud consultants of deployment can evaluate an organization's current systems, create roadmaps and offer best practices to make sure their transition to the cloud is very smooth.

Database Integration

Our cloud service professionals possess a healthy experience working with Active Directory and other Data Systems to run Synchronization.

Post-Deployment Support

RSV Solutions is committed to offer organizations beyond deployment. Our dedicated support team can provide help for the technical support after the migration and deployment.

Custom Development

Since every organization is unique with its culture in business and process, we will closely work to create a solution that is appropriate for their needs.

Cloud Migration and Deployment

In today's generation, the organizations of all sizes are planning to develop user-friendly applications that are robust, flexible, configurable, and available and access from anywhere from any device.

To provide these type of applications, developers must develop applications that are extremely dynamic. We offer organizations with cloud platform which is very effective and affordable that helps them to provide these offerings, however it requires developers to be smart with the cloud based application development technologies, platforms, and best practices.

RSV Solutions can help an organization's development constituency with specific advices for Custom Development, Software Architecture, and Service Development, Software as a Service, Cloud Metrics and Performance that help them to develop for the cloud.

We can help in choosing the best-fit cloud (public, private or hybrid); choice of platform for the organizations. RSV Solutions leverages its vast professional services capabilities to make sure that the organization's various technologies are working together.

With an approach towards, assessment, planning, security, scalability, capacity and integration, we can support organizations drive their cloud based application development and deployment initiatives in the correct path.

Cloud Infrastructure Services

RSV Solutions Cloud Infrastructure Services help enterprises to experience a highly flexible on-demand infrastructure environment that provides substantial scalability and agility for the business.

RSV Solutions can offer cloud infrastructure services that can meet the demands of an enterprise IT and help you improve productivity with scalable, secure and reliable cloud hosting for all your applications. This will in turn help you to select the right cloud deployment model, service level and management features.

We provide Cloud Hosting Services for the organizations that helps them to realize significant amount of cost savings, high flexibility, enhanced scalability, and business continuity with hosted cloud solutions for all their immediate needs of IT. We offer a wide range of Cloud Hosting Services across all cloud infrastructures such as Private, Public, and Hybrid.

This facilitation supports organizations to meet their cloud configuration to their application specific needs, including secure private clouds. We can support entire cloud life cycle needs, including consulting, process design, integration, implementation, migration, custom development, and management. SaaS, PaaS, and IaaS has been motivating organizations take their IT operations to the cloud, and we can provide all these three primary cloud models.

With the holistic approach and disaster recovery capabilities, we help organizations smoothly migrate to the choice of their preferred model. This enables organizations to have a tailor-made cloud implementation – with applications hosted in Public, Private, or Hybrid environments as per the organizations specific business and security priorities – while reaping the full benefits of one-stop platform of infrastructure.

Cloud Support Services

RSV Solutions's dedicated Cloud Support team develops a close working relationship with organizations to achieve insight about their cloud environment and technical concerns to deliver right assistance.

RSV Solutions Cloud Support Services can provide timely assistance to the customers through its highly-skilled tech-professionals who immediately respond and provide resolution to problems in order to quickly mitigate issues.

We offer several support packages to meet the specific service needs of the diverse domains.

- Cloud Environment Managed Services
- Monitoring services for Network & Security Management
- IaaS, PaaS, and SaaS component On-demand Management

- 24/7 Operation Service Management

Key Cloud Offering Benefits

RSV Solutions's comprehensive cloud offerings can help organizations to reap maximum benefits over the in-house infrastructure and software.

- Reduce Operational Costs and Capital Expenditures
- Improve Accessibility
- Improve Flexibility
- Deploy Projects Faster
- Business Agility
- Easily Adapt to Changing Resource Demands
- Pay for what you use
- Expedite Time-To-Market
- Better use of Resources
- Leverage Private, Public, and Hybrid Cloud Solutions as Needed
- Assure Stability, Scalability, Security, Maintenance and Monitoring of cloud Environments.

Cloud Offerings Delivery Approach

RSV Solutions strategic delivery approach on Cloud offerings is to deliver tailor-made tech-services to all sizes of diverse domains through flexible delivery models of Cloud such as Private, Public or Hybrid which are agile enough to frequently changing demands.

This dynamic service delivery enables easy scaling of solutions in response to client demand, matching rapid business growth or fluctuations as required. Our Cloud offerings are associated with scalability and reactivity that ensure reduced TCO (Total Cost of Ownership) and optimum ROI (Return on Investment).

We can combine three service models like Software as a Service (SaaS), Platform as a Service (PaaS), and Infrastructure as a Service (IaaS) with the cloud delivery models like Private, Public or Hybrid, since this helps us to provide the best possible tailor-made cloud offering for the organizations.
