Enhanced Threat Intelligence Subscription Service

Service Summary

Our Enhanced Threat Intelligence Subscription Service (ETISS) provides clients with continuous access to high impact, actionable threat intelligence enabling them to anticipate, detect, and defend against emerging cyber threats specific to their industry, geography, and attack surface.

The service is designed to support security and risk professionals with timely, relevant insights derived from proprietary data sources, open-source intelligence (OSINT), and dark web monitoring. ETISS helps clients make informed, strategic security decisions and align defences to the evolving threat landscape.

The ETISS is a comprehensive, subscription-based offering that delivers regular, timely, and relevant threat intelligence insights. It combines curated reporting, timely alerts, and on-demand analyst support to help organisations proactively understand and respond to the evolving cyber threat landscape. Built on intelligence gathered by our global network of experts, this service empowers clients with up-to-date threat data, strategic insights, and access to industry-leading analysts.

Subscribing to ETISS povides an organisation receives:

- ·Regular reports on threat activity, including ransomware and geopolitical developments
- ·Alerts about critical emerging vulnerabilities and cyber incidents
- ·Direct access to our TI team, experienced analysts for support, guidance, and deeper investigations via analyst support tokens and;
- ·Proactive intelligence to support risk mitigation, incident response, and strategic security planning

Service Overview

Monthly Threat Intelligence Reports

Detailed reports summarising changes in the threat landscape, including ransomware activity, significant cyber events, and geopolitical developments.

Quarterly Insights

An in-depth exploration of developments across the threat landscape, including key events from the Quarter, ransomware activity, detailed analysis of emerging trends, a vulnerability spotlight and geopolitical insights.

Annual Threat Report

The annual report provides a detailed analysis of the pivotal events that shape the cyber security environment for the year. By exploring key incidents, from the exploitation of zero-day vulnerabilities to global law enforcement efforts dismantling cybercriminal networks, we aim to equip organisations with the insights needed to fortify their operations against similar threats in the future.

Threat Intelligence Alerts

Timely notifications regarding emerging threats, namely CVE's, including mitigation steps that can be implemented, assistance in developing detection measures, and a summary of actions taken by NCC Group to address these threats.

Retained Threat Intelligence Analyst Support

Beyond our research and reporting activities, our analysts are available for ad hoc requests. These services encompass:

- **Reports & Assessments** - Threat landscape reports, threat hunting reports, and tactical assessments.
- **Dark Web Investigations** - Manual investigations conducted outside standard platforms to gather contextual information for informed assessments.
- **Malware Analysis** - Assessments of potentially malicious files or emails of concern.
    - **Takedown Requests** - Collecting necessary evidence to submit takedown requests for platforms such as GitHub, VirusTotal, and domains
