

Revolent training services

1. Overview

Revolent specialises in providing accredited, instructor-led training and technical consulting services to help organisations design, build, optimise, and support modern cloud and data platforms. Launched in 2018, Revolent delivers cost-effective, flexible solutions across the public and private sector, combining talent creation with hands-on delivery to ensure long-term capability and knowledge retention.

2. Core Training Services

Revolent delivers instructor-led, use-case-driven training designed to accelerate speed to competency. Training is delivered remotely or in-person (by agreement), typically in cohorts of up to 16 delegates, with both full-time and part-time options available. Programmes include revision sessions, drop-in support, and certification preparation.

3. Core Consulting & Managed Services

Revolent provides technical consulting services covering solution design, migration, optimisation, management, and ongoing support. Engagements are tailored to client requirements with no minimum contractual commitment, offering flexibility and scalability.

4. Onboarding, Offboarding & Service Levels

During onboarding, Revolent works with key stakeholders to define scope, deliverables, and service levels. At completion, structured knowledge transfer and handover activities are completed in line with agreed SLAs. Regular performance reviews and access to account management are included.

5. Benefits

- Create internal capability and retain intellectual property
- Reduce risk and employee attrition through skills investment
- Highly flexible, cost-effective delivery model
- Certified practitioners with an average of 4.5 years' experience
- UK-wide availability with remote delivery options

Technology-specific services

AWS Services

Revolent provides AWS-aligned training and professional services to support public sector organisations in the design, migration, optimisation, and ongoing management of cloud infrastructure. Services are delivered in accordance with recognised best practice and aligned to SFIA skill levels.

Training covers AWS Cloud Practitioner through Professional-level certifications, delivered via instructor-led, use-case-driven programmes. Consulting services include cloud implementation planning, integration, management, data analysis, and operational support.

Microsoft Services

Revolent delivers Microsoft cloud training and consulting services to support secure, scalable, and cost-effective adoption of Microsoft technologies. Services are suitable for central government, local authorities, and wider public sector bodies.

Training programmes provide accredited, instructor-led upskilling. Consulting services include cloud implementation planning, integration, management, data analysis, and support, aligned to SFIA skill levels and client requirements.

Salesforce Services

Revolent provides Salesforce and MuleSoft training and consulting services to support digital service delivery, CRM modernisation, and public sector transformation programmes.

Services include Salesforce Admin, Developer, OmniStudio, and Public Sector Solutions training, as well as consulting support for optimisation, migration, integration, and managed services.

Snowflake & Databricks Services

Revolent delivers specialist data engineering training and consulting services focused on Snowflake and Databricks platforms, supporting data modernisation and analytics programmes.

Services include accredited training programmes, hands-on data engineering pathways, and consulting support covering implementation planning, integration, management, data analysis, and platform support.
