Service Overview	3
------------------------	---

SERVICE OVERVIEW

IQVIA provide Healthcare Benchmarking and Analytics solution that is designed to provide healthcare providers and commissioners insights to help clinical, operational and financial improvements.

The solution is delivered through a secure, closed system, offering intuitive dashboards used by finance, operational, and clinical teams. These dashboards enable analysis at local, peer group, regional, and national levels, supporting benchmarking and performance comparison. The solution has been designed with NHS Trusts, for the NHS.

Dashboards and reports are regularly updated by IQVIA's dedicated analytics team, who bring deep expertise in healthcare costing and data interpretation. The solution utilises Trust-level PLICS data, supplemented with national costing data, to ensure insights are robust, relevant, and comparable.

In addition, IQVIA offers a deep-dive analytics service, providing more detailed and targeted analysis to support specific improvement priorities. This service goes beyond standard dashboards to explore cost drivers, unwarranted variation, pathways, procedures, and productivity opportunities, helping organisations translate insight into practical, evidence-based change. Findings are delivered through tailored analysis and clear narratives, supporting leaders and teams to take informed action.

Service Features and Benefits

- Regular data collection, processing, validation and quality reporting
