SERVICE OVERVIEW

IQVIA PLICS System

The IQVIA PLICS solution is an activity-based costing system that provides finance, clinical and operational teams with insights to make informed decisions, optimise resources, understand variation, and deliver measurable and sustainable value across healthcare services.

The system is easy to use, fully transparent with fast processing times, providing meaningful dashboards and reports designed specifically for clinicians, operational and financial teams within hospitals. Finance and clinical teams gain complete confidence in the integrity of their data and outputs.

The system is flexible, adapting to local requirements, data maturity, and hospital workflows. It delivers rapid, reliable calculations to support decision making. It meets national costing standards and it is kept up to date with changes.

Our experienced costing and analytics team work with you from implementation through to training and ongoing support.

IQVIA offers a hosted or on-premise PLICS solution. The hosted option provides an Azure Cloud secure solution specially designed for your PLICS outputs.

Service Features and Benefits

- Turn your data into actionable insight that can help transform services and improve patient care
- A highly experienced dedicated costing and analytics team providing end to end support to clients
- Fixed pricing – no hidden charges
- Clinically, financially, and operationally focused dashboards and reports
- Service Line Reporting
- Flexible and scalable system to meet local requirements
- Meets national costing standards now and in the future
- Benchmarking locally, regionally, and nationally
- Flexible deployment - offering on-premise, managed service or hosted service options to suit individual requirements.
- Hosted solution is right-sized for your organisation so that you only pay for what you use.
