PRICING

Service	Pricing
Care Variation and Feasibility of Change A clinical coding review and subnational assessment of patient volumes and provider-level impact of care delivery. Deliverable in XLS file, in approximately 2-3 weeks.	£16,000.00 + VAT
Detailed Subnational Assessment A sub-national data extract of care delivered by treatment centres, including those in the independent sector funded by the NHS. Volume is broken down by provider, including distinct patients and admissions, and care metrics are captured, including length of stay and indicative tariff. The pathway is also explored at high level, to understand barriers to access and inequalities in delivery of care. Deliverable in XLS and PPT files, in approximately 4-6 weeks.	£28,000.00 + VAT
Complete Patient Pathway Analysis Exhaustive review of the longitudinal care pathways of a defined patient cohort to gather insights of the patient pathway, variations, and journey of care with a final report of findings. Analysis includes demographics like age, gender, and ethnicity, diagnostic and treatment experiences, comorbidities and complications, dates and methods of admission and times between events, as well as geographical information including where patients are treated and their dynamics through the secondary care system. Particular focus is given to care inequalities and understanding the drivers of diagnostic, treatment, and care variation. Deliverable in iterative report in PPT, in approximately 10-16 weeks.	£65,000.00 + VAT
