SCHEDULE A - SUPPORT SERVICES

The IQVIA Service Team is led by an ITIL and ISO 27001 certified Service Operations Manager and comprises of a Service Desk and Technical Support team. It is the mission of the Service Team to provide IQVIA clients with a great service experience and to resolve any issues or requests in an effective and efficient manner within agreed service levels, and to the satisfaction of the client.

The IQVIA Service Desk can be contacted by email or telephone and is the initial point of contact for incident reporting and service requests. The standard service desk hours (excluding Bank & Public holidays) are Monday to Friday - 9:00am to 5:00pm.

Additional support outside of the standard hours can be accommodated. A rate card is available in conjunction with the contract to provide the costs of additional support on an ad-hoc basis, for example to cover important processing times. If more permanent arrangements are required then this can be negotiated in order to provide the required services at the required times, and in the most cost-effective manner for the customer.

All issues, including Service Requests, are reported to the Service Desk who will assign the priority of the call-in agreement with the Customer. Issues and requests can be reported either by phone call or Email to a dedicated and monitored Support inbox. When logging an incident, the customer is requested to pre-complete a standard form which asks specific questions of the problem, and this enables a more rapid assessment and allocation of issues. Each Customer agrees with the IQVIA on how to report incidents and what information will be provided when making a call to the Help Desk. The Customer documents and distributes guidelines to the users.

Incident and Request Management

All Service Desk calls are logged on the IQVIA Service Management recording tool and allocated a unique reference number which is given to the customer at the time of call logging. This reference number is used to identify the Service Request or Incident through all stages of the call lifecycle to completion. The call number is quoted in subsequent reporting and on all verbal and written communication relating to a Service Request or Incident.

Following the logging and triaging of a call, IQVIA named consultant will own and manage each Service Request or Incident through to resolution. The status of incident calls is monitored by the Service Management Team.

Service Requests (such as password reset or administrative tasks) will be managed by the Service Desk and referred to specialist resource, as necessary. The customer will be consulted prior to a service request call being closed.

The IQVIA consultant will resolve the issue in the quickest time possible and when a fix can not immediately be identified or applied, a workaround will be agreed and used where appropriate to restore normal service operation. Where the incident is due to a bug in the current product release the problem will be referred to the IQVIA Product and Delivery specialists for resolution. The problem will be fixed in the next product release unless it is a priority 1 with no workaround when it will be progressed as a matter of urgency. When problem is identified a Problem Record is opened, and this is managed and reported on within the Problem Management process.

IQVIA will ensure that the Customer is informed when a call is resolved, and the record is to be closed. Where a fix is provided, the incident will be closed only after the fix has been tested and approved by the Customer.
