Solution at a Glance

| CUTTING EDGE TECHNOLOGY

MeVitae's resume parsing solution employs cutting-edge AI and machine learning technologies to interpret a diverse array of resume formats and complexities, ensuring you receive the most accurate and detailed data extraction.

| REAL-TIME EXTRACTION

Instantly parse and organise information improve candidate experience by auto-filling application forms. Improve recruiter experience by showing what matters in a consistent format or parse into a detailed JSON object for any other use.

| SEAMLESS INTEGRATION

Connect effortlessly with 30+ ATS and HCM platforms or use our standalone API. Enable redaction, formatting, and structured outputs through a single, unified endpoint.

Solution at a Glance

| UNMATCHED ACCURACY

Delivering unmatched accuracy in data extraction and adherence to international data protection laws including GDPR. Our system is designed to ensure that all information is handled securely, respecting privacy and maintaining compliance.

| CONFIGURABLE EXTRACTION

Tailored field extraction based on hiring needs and requirements including parsing of over 40+ document formats, including PDF, docx, doc, PNG, JPEG.

| ENABLED ANONYMISATION

Toggle anonymisation for unbiased recruitment, removing over 30+ personal identifiable details such as name, gender, email and location. Reduce the potential of bias for a fairer review and hiring process.

“Simple and easy to use, plug’s in to our current ATS.”

ETHAN H. 25K+ EMPLOYEE SIZE. GOVERNMENT ADMINISTRATION.

Metrics:

Achieve rapid, enterprise-grade document processing with globally compliant parsing that handles high volumes, multiple formats, and multilingual data, accelerating workflows while maintaining accuracy, consistency, and security.

32K

INSTANT DOCUMENTS

Parse large-scale document batches with unmatched speed.

100%

GLOBAL COMPLIANCE

Meet international data, privacy, and regulatory standards.

50+

LANGUAGES PARSED

Extract structured data from multilingual resumes and documents.

90%

FASTER

Dramatically reduce manual processing time.

Onboarding:

ONBOARDING & POST-SALES SUPPORT

Each client is introduced to a dedicated Customer Success Manager to guide implementation and ongoing success. Client requirements include all configurations available and best practices are captured to create a tailored implementation plan; covering HR system integration, user acceptance testing, and digital training sessions.

Once live, clients benefit from quarterly catch-ups and access to MeVitaе's support team. Our 2025 performance consisted of Monday to Friday, 9am–5pm (UK time) support hours, 100% response and resolution SLAs achieved, and 99.74% system availability.

TECHNICAL SUPPORT:

Data backup and recovery:

Point-in-time recovery is enabled by default. All entities are securely stored for 7 days, allowing rapid restoration to any moment within the previous week.

MeVitaе's maintenance & outage windows

MeVitaе conducts quarterly maintenance exclusively over weekends (Saturday & Sunday). Advance notice is provided when any service impact is expected.

No outage windows are needed.

Hosting options and locations

Our services are hosted on public cloud services, or by a select number of sub-processors, also hosted in public cloud environments.

TECHNICAL REQUIREMENTS

To complete technical integration, the following access is required (full details provided during onboarding):

01

Admin-level ATS access

02

API service user for API operations

03

IT or implementation partner support for SSO and full technical setup [required for only some ATSs or editor access]

SERVICE PROVIDER	SUPPORTED LOCATION	PURPOSE
Microsoft Azure	UK, Netherlands, Ireland, Germany	Cloud service provider for data storage and processing.
Amazon Web Services	UK, Ireland, Germany	Cloud service provider for data storage and processing.
Google Cloud Platform	UK, Netherlands, Belgium, Germany	Cloud service provider for data storage and processing.
Redis	UK, Netherlands, Belgium, Germany	Cloud service provider for data storage and processing (hosted on Google Cloud Platform).
CloudConvert	Germany	Cloud service for converting documents (docx, odt, etc.) for redaction.
Cloudflare	Worldwide CDN	Cloud service for network protection.
SendGrid	US, EU	Cloud service for sending emails. Used to verify emails addresses and send notifications.

Offboarding:

SUPPORT

Should a client leave MeVitae, integrations are cleanly disconnected on the termination date. Users receive clear instructions for any actions required on their side. Data extractions can be requested at any time during or at the end of the contract, with flat-file downloads fully supported.

Security Overview:

SECURITY GOVERNANCE

Security is at the forefront of all we do. With board-level oversight and ISO/IEC 27001 and 9001 certifications, MeVitae follows a rigorous Information Security Policy supported by specialised controls, from cryptography to personal data protection. Standards are upheld through ongoing internal audits and monthly leadership reviews.

Operational Security

CHANGE & CONFIGURATION MANAGEMENT:

Every infrastructure or personal-data-related change follows recognised frameworks (CSA CCM, SSAE-16/ISAE 3402). Formal risk assessments, enforced controls, and CTO sign-off to ensure a tightly governed environment.

VULNERABILITY MANAGEMENT:

Automated Azure scanning, GCP Docker image analysis, quarterly internal penetration tests, and annual CREST-certified assessments keep threats in check. Risks are evaluated using OWASP guidance, with critical issues patched within 24 hours.

PROTECTIVE MONITORING:

A dedicated Security Incident Management Procedure enables rapid containment and guarantees customer notifications within one hour.

ISO/IEC 27001 and 9001

INCIDENT MANAGEMENT

Fully aligned to ISO/IEC 27001 and 9001, MeVitae provides round-the-clock incident reporting via phone or email, supported by real-time detection systems. Every incident is managed through a structured workflow, from containment to authority communication, with customers notified within an hour and receiving a full report within 48 hours.

SECURE DEVELOPMENT

MeVitae's development lifecycle is built on industry best practices and independently assessed against ISO/IEC 27001 and 9001, ensuring security is embedded into every stage of product creation.
