

Pricing Document

Our pricing consists of two parts – one of setup, which includes training and implementation and a monthly fee, which can be paid monthly, quarterly or annually.

Our contracts are priced bespoke every time, so it depends on the number of users, etc., and it is an all-in price that covers everything, and any upgrades and service enhancements are provided free during the contract.

The usual set-up fee is between 1,000 and 4,500 GBP, depending on the size of the deal and if in-person training or online training/train the trainer is required, etc.

Contracts range from 500 – 5000 GBP per month, depending on complexity and number.

All prices + VAT.
