Thank you for considering AllThorpe Consulting

Henry Rivera
Managing Partner

We are an established management consultancy with extensive experience of working with public sector organisations including law enforcement and justice.

We are best known for the way in which we work with our clients, where we earn their trust and respect as we collaborate closely to deliver tangible, sustainable and impactful outcomes.

Our team consists of a diverse range of talented, highly qualified and driven people trained in a multitude of recognised consulting techniques. What sets us apart is the depth of experience we bring individually and collectively. Our advice, guidance and support to clients is forged from real-world experiences; we draw from our own knowledge and from an extended network of relationships with suppliers and likeminded organisations.

Our skill sets represent complimentary capabilities organised around client's needs that are often focused on delivering very specific and measurable outcomes. Being able to empathise with our clients' objectives and goals is as important to us as it is to them.

Underpinning what we do, is how we do it. Our firm is built on a set of values that respect the real priorities that people have in their lives. These values are extended to our clients and those that we are lucky enough to work with. We will always do the right thing, irrespective of how hard it can be at times. Creating an environment of trust, commitment and friendship is how we do business.

If you are looking for a partner to work with, and make a difference, get in touch.

Law Enforcement Intelligence and Analytics

Intelligence systems form a key part of every law enforcement agency, especially given its key role in the core business processes. The challenge of making best use of intelligence is forever growing, and more so when the information pool is forever increasing in size, complexity and sources. AllThorpe supports our clients in identifying and helping access data sources from public, private and open sources, merging data together and using intelligence analytical tools to fully exploit the assets in a manner that assists officers and staff.

Service Features

- Assessment of intel analytical tools and the supplier market for their ability to meet requirements.
- Development of Intelligence strategic requirements and alignment to organisational priorities.
- Consider and evaluate data sources for intelligence purposes.
- Production of strategic roadmaps
- Production of governance and policy frameworks.
- Development of Outline Business Case(s) using market intelligence, discovery findings and experience.
- Present fully costed options to leadership, with benefits profiles.
- Ongoing leadership, assurance and oversight of discovery.
- Support during the full discovery cycle.
- Stakeholder management including those outside the organisation.

Service Benefits

- Specific and relevant to Law Enforcement and Justice requirements and characteristics
- Independent analysis based on business requirements and presentation of options for leadership.
- Analysis and confirmation of requirements, opportunities and constraints.
- Active management of risks with opportunities presented in Outline Business Case.
- Achieving the most optimum value for money.
- Continuous support of internal and external stakeholders.
- Achieving the best and most favourable recommendations for the organisation.
- Exploration of internal capabilities.
- Establishing pace, grip and creating a sense of urgency.

Approach to Planning

AllThorpe offers the use of a proven delivery framework that is strongly rooted in simplicity and pragmatism. No proprietary tools are used, ensuring our clients are familiar, comfortable and confident in the decisions required and the pace at which the work is being delivered.

The approach to planning considers the following features:

1) Availability of client stakeholders
2) The efficient use of client time
3) Budget and urgency of priorities
4) Existing constraints and the options
5) Operational risks
6) Potential for additional value
7) Organisational strategy
8) Technology and sector trends
9) Information management

Our planning creates a sense of urgency by driving the completion of tangible milestones as early as possible and generates grip by having granular visibility of tasks as they are worked rather than completed. Underpinning the framework is a priority towards flexibility, responsiveness to surprises and proactive management of risks. These characteristics of our planning approach allows for a plan that is robust, resilient and efficient.

All planning is developed in collaboration and is integrated with the organisation's other priorities. The people aspect of the plans will include capability and career development, serving the needs of individuals while creating greater organisational resilience in support of the technology and business solutions being deployed.

Setup and Migration

AllThorpe offers a comprehensive migration service based on experienced gained deploying wholesale transformation into law-enforcement where continuity of service and minimal operational disruption are critical. The approach to migration addresses three distinct phases:

1) The setup and preparation, focuses on preparing the people impacted by change and setting up the technology so it is ready for immediate use in a manner that does not compromise the organisation's operational ability, this normally refers to data having been migrated and accessible as part of usual business.
2) The go-live events, establishing a hyper-care bubble around the people, technology and external stakeholders.
3) This stage can range from hours to weeks and serves to reduce all forms of risk and maximises the success of the endeavour.
4) Transition, aims to move the business change towards a sustainable, efficient and embedded way of working, responding to the lessons from the go-live event and withdrawing the additional support in a controlled manner.

Setting up the service and migration across to it, is managed in a manner that continually adapts and responds to lessons learned. The goal is to manage risk, keep the migration to a minimum, and to ensure the benefits sought are not lost.
