

Secure Website Development & Digital Portals

Service Definition – G-Cloud 15

Comet Business Global Solutions Ltd

Company Number: 07662630

Registered Address: 8 Chesterford Road, London, E12 6LB

1. Service Overview

Comet Business Global Solutions Ltd delivers secure, compliant website and digital portal development services tailored for Public Sector, Healthcare, and Financial Services organisations.

We specialise in Privacy by Design digital platforms that meet WCAG 2.2 Level AA accessibility requirements. Our SC Cleared developers build robust, inclusive, and legally compliant solutions ranging from secure citizen portals to NHS-facing informational websites.

2. Technical Frameworks & Standards

Technical Area	Approach
Content Management Systems	Secure configuration of WordPress, Squarespace, and Wix for enterprise use
Custom Portal Development	Bespoke secure portals for data capture and stakeholder engagement
Accessibility Compliance	WCAG 2.2 AA/AAA and GDS Service Standard adherence
Responsive Design	Mobile-first, fluid layouts across desktop, tablet, and mobile

3. Service Features

- Security by Design and Privacy by Design architecture
- UK GDPR and ePrivacy compliance across forms, cookies, and data capture
- Secure UK-based hosting, SSL certification, and domain management support
- Design and build of secure login portals for sensitive data exchange
- Controlled integration with official social media platforms
- Technical liaison with third-party processors and API providers
- Security and resilience audits of existing web estates
- Executive-level advice on content structure and information architecture

4. Key Deliverables

Deliverable	Outcome
Custom Digital Platform	Fully tested, secure, and responsive website or portal

Compliance Documentation	Formal WCAG accessibility and DPIA privacy compliance reports
CMS Training & Handover	Enablement of internal teams to manage content securely
Support & Maintenance Roadmap	Guidance on patching, hosting, and long-term support
Security & Privacy Audit Statement	Documented Security by Design controls implemented during build

5. Service Levels & Quality

Vetted Development	Security Rigour	Flexibility
SC Cleared consultant leading delivery	Banking-grade security applied to public sector digital services	From rapid microsites to complex, multi-year digital programmes

6. Onboarding & Exit Strategy

A structured Discovery phase is initiated within 5 working days to define user needs, security requirements, and technical constraints.

At contract end, all source code, assets, and administrative credentials are transferred to the client. We ensure full ownership of digital assets with no proprietary lock-in.
