

Bespoke Cyber and Crisis Exercising Service

Designed To Your Specifications

Unplanned events can have a devastating impact on your organisation, rehearsing your response to crisis will ensure you are prepared to react when the worst happens. We understand no two organisations are the same, our bespoke cyber and crisis exercising service offers a highly versatile platform which allows us to customise an entire exercise to suit your unique needs. These exercises are built by GDAK's expert consultants from the ground up, based on a foundation of your requirements coupled with our extensive exercising, crisis and event management experience.

Key Features

This package is entirely designed to suit your needs, as a minimum it includes:

- A thorough, multi-stage scoping process with our dedicated consultants to explore and define your objectives and requirements.
- An exercise designed from the ground up entirely to suit you, incorporating your structure, policies and procedures into the exercise design.
- An agreed delivery plan (approved by you).
- A delivery method and duration to suit the objectives from a discovery workshop through to large scale live rehearsal.
- Virtual, on-premise or multi-site delivery.
- A comprehensive exercise report in a format tailored to you, capturing observations and recommendations for next steps.
- An in-person after action review to discuss the outcomes of the exercise and outline next steps for continual development.

Key Benefits

- Rehearse, test, and validate your response in a safe and immersive situation.
- Increase education and awareness of cyber security and organisational processes.
- Develops confidence in the workforce to prevent and respond to cyber incidents.
- Consolidate organisational knowledge to identify gaps in skills, processes, and technological controls.
- Detailed and realistic scenarios based on the Network and Information Systems (NIS) directive and the most up-to-date research on cyber threats.
- Team building opportunities for your organisation, to work better together when it matters.

Your Journey

Assess

During our scoping session we will work with you to capture your objectives, understand your priorities, and identify the outcomes for success. Having this knowledge will allow our experts to design a fully bespoke journey. We will capture the deliverables, focusing on current and evolving crises relevant to your organisation.

Design

We will create a detailed delivery plan based on your organisation's requirements and our research for your approval. Using our agile approach to delivery we can adapt to change. We will pitch high level bespoke scenarios for you to choose from. These will be thoroughly researched, drawing upon our operational and exercising expertise and the needs of your organisation to ensure that we provide you with a bespoke and highly valuable experience.

Develop

At this stage, you can sit back and allow us to create a truly bespoke package and experience. Our dedicated team of subject matter experts will develop the exercise ready for delivery.

Conduct

GDAK can deliver on premise, virtually, or a combination to suit your needs. Bespoke exercises can be delivered over multiple sites and to a duration that suits your requirements. We can deliver solutions from short table-top events through to large scale inter-department, multi-site immersive events. During the event we will provide expert facilitators and observers, ensuring the event runs smoothly.

Evaluate

Following delivery, we will provide you with an exercise report that is bespoke to your needs within an agreed timescale. We will conduct an in-person after action review to discuss the content of the report and answer any follow-on questions you may have. We can also work with you to develop a pipeline to build on lessons identified from the exercise, providing an opportunity for continual growth. This package provides you with the exercise material allowing you to review and reuse as required.

Our Methodology

Over many years we have developed an accessible and effective methodology that means we do the preparation and design for you. We understand that your time is important; all we need is a willingness to participate and to understand goals for transformation. We will then recommend, define, design, and deliver a holistic exercise that matches your requirements.

"This has been a journey for my team, and we have benefitted enormously from the experience..."
