# Features & Benefits

ZERO PLUS<sup>+</sup>

## Features

- Enterprise App Catalogue delivers the right apps to any device
- Catalogue can be easily customised to transform employee onboarding
- Conditional Access policy enforcement to mobile, web, and Windows apps
- Record application, device and console events to capture detailed information
- Allow desktop administrators to automate application distribution and updates
- Remotely monitor and manage all devices connected to your enterprise
- Enforce authentication strength and restrict access by device restrictions
- Automate device compliance for advanced data leakage protection
- Federates even the most complex on-premises Active Directory topologies
- Leverage both new and existing forms of 3rd party authentication

## Benefits

- Email app supports your mail accounts and integrates with repositories
- View integrated calendar without having to navigate between apps
- Secure email and attachments through the Workspace ONE UEM SEG
- Use content app to push/manage secure content on the device
- Support your end users with remote assistance and troubleshooting
- Remote configuration management allows employees to provision new devices
- Employees determine desired level of access and corresponding management
- User interface is simple, intuitive and responsive
- Self-Service App Store meets consumer-style expectations
- Enable employees to access the resources they need remotely

# Ordering process

We deliver similar services to many UK Public Sector organisations and are here to help and advise. We can help you through the whole procurement process, to help ensure that both parties are in compliance with the Digital Marketplace Buyer's Guide.

## Ordering Process –

We are an experienced Digital Marketplace frameworks contractor.

Upon engagement, we will discuss and validate your requirements and scope of work and support you through the completion of the Call Off Agreement.

We will then set up a mutually acceptable start date and commence work. Invoicing will either be based upon the SFIA rate card agreed, or the per unit cost of the agreed scope of service.

Payment terms are 30 days and payable either by BACS or GPC card.

## Customer Responsibilities –

For any given call-off requirement, we will identify any dependencies on the customer or pre-requisites for the service (e.g. access to key stakeholders, inputs to critical review processes, etc.) and agree these at the start of the work.
