- Architectural system design
- System security reviews
- Security Gap Analysis

Threat Intelligence

- Threat Intelligence management
- Threat hunting
- Analysis and Insight

BAU Operational Support

- Policy and Procedure
- Security Operation Centre
- Incident Management

Service Description

ZERO PLUS⁺

COMSoleMio provides secure console access to your network infrastructure via a web portal.

With MFA and optional Single Sign-On (SSO).

Terminal servers, connected to the console port of your network devices, are equipped with a multi-provider mobile Out-of-Band connection and integrated UPS for up to 12 hours autonomy.

Features & Benefits

ZERO PLUS⁺

Features

- 24/7 management console access to your network devices
- Multi-Factor Authentication, with optional IdAM and IdP integration
- Managed service - no additional burden to your team
- Mobile network connectivity for encrypted Out-of-Band secure access
- Fast integration with no change required to existing infrastructure
- Private Cloud, Public Cloud and Hybrid delivery models
- Retention of results for historical access and session
- Data encryption at rest and in transit.
- Terminal Server in Stealth mode (no inbound access)
- Up to 12 hours power autonomy

Benefits

- 24/7 secure console access to network devices
- Out-of-band access using independent mobile connectivity
- Zero Trust architecture with no inbound device access
- Session logging and historical access
- Optional high-availability and power autonomy
- Mitigate cost associated with service downtime.
- Reduce site visits with out-of- band console access.
- Manage your network device regardless of its state or connectivity.
- Browser access - no need for additional software.

Ordering process

We deliver similar services to many UK Public Sector organisations and are here to help and advise. We can help you through the whole procurement process, to help ensure that both parties are in compliance with the Digital Marketplace Buyer's Guide.

Ordering Process –

We are an experienced Digital Marketplace frameworks contractor.

Upon engagement, we will discuss and validate your requirements and scope of work and support you through the completion of the Call Off Agreement.

We will then set up a mutually acceptable start date and commence work. Invoicing will either be based upon the SFIA rate card agreed, or the per unit cost of the agreed scope of service.

Payment terms are 30 days and payable either by BACS or GPC card.

Customer Responsibilities –

For any given call-off requirement, we will identify any dependencies on the customer or pre-requisites for the service (e.g. access to key stakeholders, inputs to critical review processes, etc.) and agree these at the start of the work.
