Service Description

ZERO PLUS[⊕]

Zero Plus delivers a fully managed Fortinet-based network and security service, providing secure, scalable connectivity across cloud, hybrid, and on-premise environments. Using Fortinet SD-WAN and NGFW technologies, the service supports UK Public Sector organisations with Zero Trust aligned security, full lifecycle management, and ITIL-aligned operational support.

Features & Benefits

ZERO PLUS⁺

Features

- Managed Fortinet firewall and SD-WAN service
- Support for cloud, hybrid, and on-premise environments
- Zero Trust aligned Fortinet Security Fabric
- Installation, configuration, and service onboarding
- Continuous monitoring and threat detection
- ITIL-aligned incident, problem, and change management
- Centralised management using a single Operating System
- Traffic inspection, optimisation, and policy enforcement
- Flexible support hours up to 24/7/365

Benefits

- Improved protection against cyber threats
- Consistent security across all environments
- Reduced operational and management overhead
- Greater visibility of applications and traffic
- Faster detection and response to incidents
- Scales easily with organisational growth
- Improved network reliability and performance
- Supports regulatory and security compliance
- Predictable and cost-effective managed service

Ordering process

We deliver similar services to many UK Public Sector organisations and are here to help and advise. We can help you through the whole procurement process, to help ensure that both parties are in compliance with the Digital Marketplace Buyer's Guide.

Ordering Process –

We are an experienced Digital Marketplace frameworks contractor.

Upon engagement, we will discuss and validate your requirements and scope of work and support you through the completion of the Call Off Agreement.

We will then set up a mutually acceptable start date and commence work. Invoicing will either be based upon the SFIA rate card agreed, or the per unit cost of the agreed scope of service.

Payment terms are 30 days and payable either by BACS or GPC card.

Customer Responsibilities –

For any given call-off requirement, we will identify any dependencies on the customer or pre-requisites for the service (e.g. access to key stakeholders, inputs to critical review processes, etc.) and agree these at the start of the work.
