Corporate Transport

Technology that powers convenient,
efficient and sustainable, shared transport.

Liftango Overview

Liftango provides a single technology platform that powers some of the most successful shuttle, carpool and demand-responsive transport programs across the world.

Our mobility platform helps you provide flexible and efficient commute options, designed around the ever changing needs of your workforce.

We help cities, communities and organizations reduce congestion and combat climate change by providing equitable access to shared transport through a technology platform that makes the best use of the capacity of any vehicle

while giving passengers the freedom to travel the way they want to.

We believe access to transportation is a fundamental right for people in modern society and through our technology, we provide convenient, efficient and sustainable transportation for the people that need it the most.

Our Vision

Unlock all the good that comes from shared transport.

Our Mission

Make sustainable and meaningful connections through a unified platform to optimize transport systems and combat climate change.

Today, Liftango works with over 50 partners. We are helping:

Cities evolve into
Smarter Cities

Private bus operators to
digitize their services to
become more efficient

Transit agencies to
create a better public
bus system

Property developers to design sites
around future mobility solutions
instead of using space for parking

Corporates to create sustainable
and scalable mobility solutions
for their staff

Our simple goal:

To reduce the number of cars on the road.

Sustainability matters.

Make an instant impact. Less cars means less CO₂ emissions. We'll provide a pathway for your organization to be climate-positive straight away.

On average our clients save as much CO₂ as 31 football fields of forest every year.

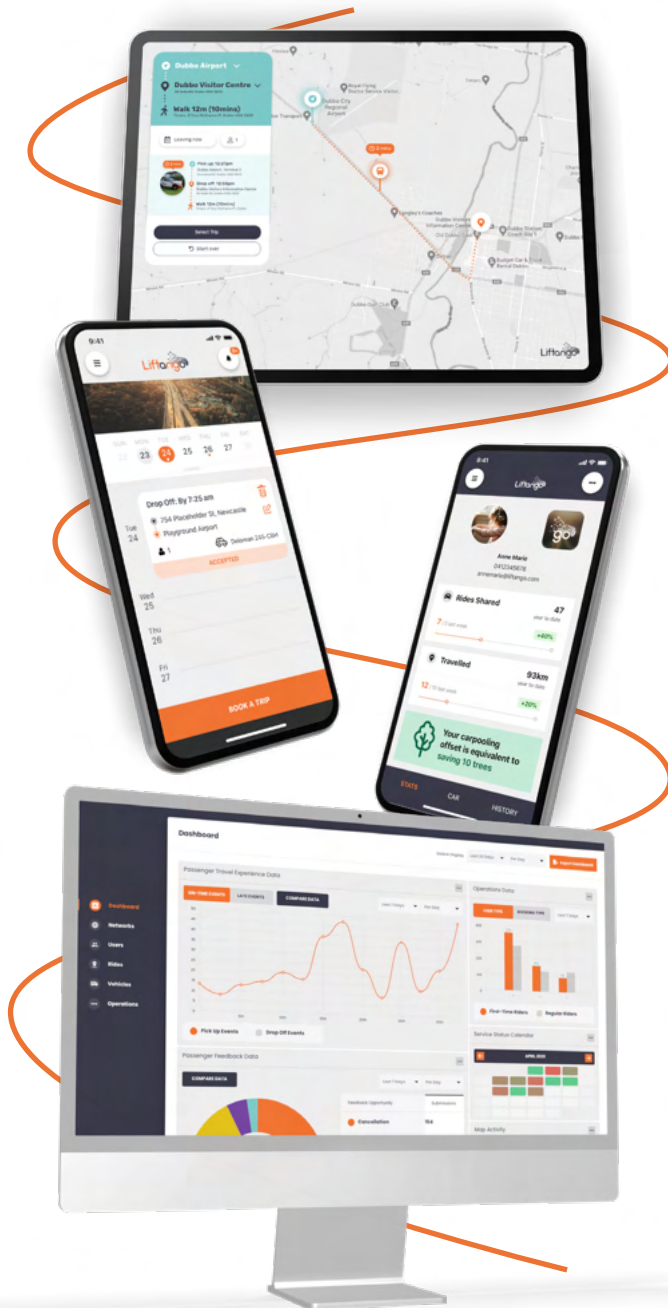

Parking capacity is a huge problem.

Studies have shown that up to 30% of a city's traffic is caused by people looking for parking. This amounts to billions of dollars in lost productivity and even more wasted space building more car parks.

- INRIX

Put transport where the people are

One platform to manage your mobility needs.

SHUTTLE SERVICES

Easier to manage and convenient for passengers.

DEMAND-RESPONSIVE

Dynamic scheduling and routing of vehicles to passengers.

CLIMATE-POSITIVE CARPOOLING

A carpooling program to completely offset all vehicle emissions.

OPERATIONS

Real-time visibility and reporting capabilities.

INTEGRATIONS

Seamless integration with commuter benefits programs, trip planner applications or SSO requirements.

Commutifi

luum

You're in good company.

Join the many organizations leveraging
the power of shared mobility.

Get started

At Liftango, we guide global organizations and cities on how to plan, launch and scale shared mobility projects. We solve parking, congestion and zoning problems by improving the efficiency of transport services.
