1 ABOUT CYBER SECURITY DEFENCE CONSULTANTS

Our teams work within complex and diverse environments to achieve strategic, operational and realistic outcomes, which have included ISO/IEC27001. Cyber Essentials and Cyber Essentials Plus.

Over multiple consultancy contracts, we have developed and implemented information risk management processes which support our client's governance models, as well as providing support to control specific target areas, improving processes and mitigating risk. This has increased the level of security controls, ensuring that the risk appetite of the organisation and the level of cyber threat faced is reduced.

We engage experienced and qualified consultants who are up to date with all legislative practices to effectively support organisations to manage risk.

Our team is qualified under the NCSC Certified Cyber Professional Scheme and hold qualifications including CISSP, CISM and ISO/IEC 27001 Lead Auditor and Lead Implementer.

Our cyber security consultancy engagement process is aligned to the NCSC Certified Cyber Security Consultancy Standard, ensuring a high-quality client journey including agreed deliverables, clear and regular reporting, defined escalation paths, suitably skilled and qualified resources and focused delivery.
