

Microsoft Cloud Security and Compliance

G-CLOUD 15 SUBMISSION: Jan 2026

Our Company Overview

As a Microsoft Solutions Partner and Cloud Solution Provider, we specialise in serving Large Enterprises, Government entities, and Technology scale-ups. Our approach integrates three core services: Resourcing, Solutions, and Learning. This synergy fosters a dynamic IT ecosystem that elevates the growth of your business through innovation and educational empowerment.

About Stable

As a Microsoft Solutions Partner and Microsoft Supplier specialising in Defence and National Security, Stable provides technical advice and guidance on the broad range of controls available through the Microsoft Security and Compliance Centers. Stable help organisations manage their data securely in the Public Cloud using NCSC and Microsoft “Best” practice.

Service Features

- Compliance Review
- Security Assessment
- Licensing and Usage Review
- Sensitivity Labels Design
- Data Loss Prevention (DLP) Design
- eDiscovery Design
- Microsoft Defender Design - Cloud
- Microsoft Defender Design - Identity
- Microsoft Defender Design – Endpoints
- Microsoft Purview
- Microsoft Priva
- Jump Secure for Secure Administration
- Audit Search and Sentinel

- Microsoft Copilot for Security
- Entra ID
- Security assurance services
- Privileged Access Workstations (PAW)

Service Benefits

- Reduces risks around Data Loss
- Enables organisations to manage how information can be shared
- Provides a report on costs
- Measure costs against usage and benefits
- Provides auditing relating to data access in the cloud
- Enables control of access to data based upon location
- Reduces risks around malware and ransomware
- Provides compliance around DPA and GDPR
- Enables Cyber Essentials Plus certification
- Facilitates Defence Accreditation Risk Tool (DART) Accreditation
- Protects against Insider Threat
- Provides advanced threat protection of your Estate and apply AI
- Apply Secure by Design principles

Planning

Planning service	Yes
How the planning service works	Our journey starts with a conversation. We first need to understand your organisation, people and culture. We need to get a picture of your current issues and start to build up an understanding of your Risks and your strategy around Cloud services. We recognise that Cloud Security is a relatively new discipline and is evolving rapidly. Whilst we advocate a vendor-first approach we also understand that third-party tooling is often in the mix and we can advise around that too. Our Discovery workshop allows us to understand the capabilities you already have from the perspective of licensing, in-house skills and technology. From there we conduct assessments of your Security and Compliance posture and provide recommendations. We will often suggest a crawl, walk, run approach for introducing new features to your organisation and are proponents of having Senior Level sponsorship for those changes. With many years of experience delivering Enterprise level systems, Stable can provide pragmatic and realistic guidance around the design and implementation timeframes for all aspects of Security and Compliance in the Microsoft Cloud; including nuances around the Secure Administration tier such as Privilege Access Workstation (PAW) and Privileged Identity Management (PIM).
Planning service works with specific services	Yes
Hosting of software services the planning service works with	Microsoft 365 Compliance Center Microsoft 365 Security Center

Training\Learning

Learning service provided	Yes
How the training service works	As a Microsoft Solutions Partner that employs qualified Microsoft Certified Trainers, we provide the full range of Microsoft Certifications around the Platform. We can tailor learning based on individual requirements to suit your needs.
Training is tied to specific services	Yes
List of supported services	Microsoft 365 Azure Dynamics 365 Power Platform

Setup and Migration

Setup or migration services provided	Yes
How the setup or migration service works	Setup and Migration is structured on a case by case basis depending on the requirements of the end client and what the workloads are. Utilising our experience as a Microsoft Solutions Partner and the support of our three core services, we can adapt to each requirement as needed.
Setup or migration is for specific cloud services	Yes
List of supported services	Microsoft 365 Azure Dynamics 365 Power Platform

Quality assurance and performance testing

Quality assurance and performance testing service	Yes
How the quality assurance and performance testing work	Our QA and performance testing approach follows industry best practices and Microsoft Cloud Adoption Framework principles. We ensure all solutions meet functional and non-functional requirements through:

	• Test Planning – Define scope, objectives, and acceptance criteria. • Functional Testing – Validate features against specifications. • Performance Testing – Conduct load, stress, and scalability tests. • Security Testing – Apply vulnerability scanning and penetration testing aligned with Cyber Essentials. • Reporting – Provide detailed test reports, defect logs, and recommendations for remediation.
