

Infinity Platform Agreement

Increase Protection and Reduce TCO with a Consolidated Security Agreement

The past year witnessed a 90% increase in ransomware attacks, underscoring the need for robust cybersecurity measures. At the same time, the global cybersecurity sector faces a significant talent gap, leaving around four million positions unfilled. The evolving threatscape combined with the talent shortage and complexity of managing disparate security tools is exacerbating the difficult task faced by Chief Information Security Officers (CISOs) of maintaining an acceptable security posture for their organization.

In response to these challenges, Check Point's Infinity Platform Agreement is engineered to provide access to the company's full set of solutions, services, and support programs within a simple procurement framework. From off-the-shelf, all-inclusive contracts to tailor-made subscription plans, you have the flexibility to choose the structure that aligns best to the unique needs of your business and to enjoy additional benefits that help reduce your overall security spend.

Collaborative Threat Prevention

Protect the entire IT infrastructure with Real-time threat intelligence through advanced AI engines

Simplicity and Efficiency

Invest in unified security policy management for streamlined operations and simplified procurement

Investment Flexibility

Choose a contract structure that best fits your business needs, with flexible allowance agreements

Reduce TCO

Infinity is a consolidated security suite delivering an average 47% increase in operational efficiency and an average 20% reduction in security costs.

A Simple and Predictable Procurement Model for Your Cyber Security Needs

The [Infinity Platform Agreement](#) offers an all-inclusive per annum pricing model that includes all security hardware, software, subscriptions, 24x7 support and professional services, allowing organizations to transition between different enforcement points as needed throughout the year. Whether you're looking to move some workloads to the cloud or back to the datacenter, you can use the same contract and stay agile as your needs change throughout the year, with no need to renegotiate anything.

Invest in what you need

Choose the right solutions to secure your organization.

- ✓ Quantum network security, Cloudguard cloud security, Harmony to secure the anywhere workspace
