

Patch Management That Just Works

with real-time discovery and remediation of third-party and OS vulnerabilities

Action1 pioneers autonomous endpoint management with an infinitely scalable, highly secure, cloud-native platform configurable in 5 minutes — and it just works, with no VPN needed. **First 200 endpoints are free forever:** test as long as you want in your enterprise or use perpetually in your small business.

Unified OS and Third-Party Patching

Automate the entire patching process for remote and onsite endpoints, from identifying and deploying missing updates to compliance reporting.

Vulnerability Discovery and Remediation

Prevent security breaches and ransomware attacks. Detect vulnerabilities in OS and applications in real-time, and enforce remediation.

Secure and Trusted: SOC 2 and ISO 27001

Action1 is the first vendor focusing on patch management certified for SOC 2 Type II, ISO/IEC 27001:2022, and TX-RAMP.

Just knowing how prevalent ransomware is now and understanding that we've mitigated this risk by properly patching our third-party applications through Action1 is a huge relief for us.

Johnathan Kim, Director of Technology
at the Woodland Hills School District

Action1 ranks as America's #1 fastest-growing private software company on the Inc. 5000 list.

Patching That Just Works

Why Action1?

Autonomous Endpoint Management

Automate patching, issue resolution, and configuration to cut IT overhead, enhance security, ensure compliance, and boost efficiency—all in one platform.

Enterprise Integrations

Integrate Action1 with Active Directory, Entra ID, Okta, Duo, and Google. More integrations are available via REST API or PowerShell scripting.

P2P Distribution

Minimize external bandwidth usage and ensure rapid deployment of large updates without any on-prem cache servers.

Third-Party, OS, and Custom Patching

Automate patching for macOS, Windows, and third-party software from a private repository with 99% patching coverage. Patch custom software. Update offline endpoints."

Vulnerability Remediation

Identify all vulnerable software and OS installed on endpoints in real-time. Leverage built-in vulnerability remediation in a single solution.

Real-Time Visibility

Instant visibility into vulnerabilities (no periodic scans), missing updates, and real-time patching progress. Live dashboard for SLA-based patch compliance

Enterprise Scalability

Cloud-native platform: designed for millions of endpoints. No VPN needed. Customizable RBAC, SSO, MFA. Real-time progress tracking.

5-Minute Setup

Start patching your endpoints in under 5 minutes and rapidly scale to as many endpoints as needed. No dependency on legacy tools, clunky integrations and feature overload.

Data Residency Options

Action1 has data centers located in the USA, Europe, and Australia. More data centers are coming soon.

All-Inclusive Pricing

Get your first 200 endpoints for free. Scale up at a simple, transparent and all-inclusive rate. No hidden fees or nickel-and-diming for additional features (e.g. SSO).
