

Horizon MDR/MPR

Managed Prevention & Response

The Leading Prevention-First MDR/MPR

Horizon Managed Prevention and Response takes the traditional Managed Detection and Response services to the next level with the introduction of the leading prevention-first MDR/MPR solution. Horizon MDR/MPR provides continuous updates, automated prevention actions, optimal configurations, recommendations, and best practices to improve defenses and prevent future attacks.

Horizon MDR/MPR is powered by the industry's top experts and leading AI technology to proactively prevent, monitor, detect, investigate, hunt, respond, and remediate attacks on customers' environments.

We monitor your security estate 24X7, covering your entire infrastructure: network, endpoint, email, and more, make informed decisions to stop attacks, and improve defenses to prevent future attacks.

Prevention-First

Best practices to improve defenses and prevent future attacks

Simplicity

24x7x365 service by our elite experts

Elevate Security

Advanced threat prevention powered by AI-based analytics

One Solution

Prevent, monitor, detect, investigate, and remediate attacks

Optimized Prevention: End-to-End Proactive SecOps Powered by Industry Leading Analysts

- We monitor your entire IT infrastructure 24x7x365 to accurately detect real attacks across network, endpoints, email, cloud, mobile, and IoT.
- We prevent attacks from spreading in your organization by embedded prevention first approach in MDR, both prevention configurations and recommendations.
- We perform in-depth incident investigations and proactively hunt for threats using the industry's most powerful threat intelligence, AI analytics tools, and Mitre Att&ck.
- We continually make threat prevention better through ongoing ThreatCloud updates.
- We rapidly respond to real threats, using orchestrated responses with automated playbooks to remediate your environment and improve defenses to prevent future attacks.

Horizon MDR/MPR Key benefits

- **The leading prevention-first MDR/MPR solution;** continues updates, automated actions, configurations, recommendations, and best practices to improve defenses and prevent future attacks.
- **Simplicity** - the industry's top analysts, incident response, and research experts – Deliver prevention, investigation, response, and threat hunting service 24x7x365.
- **Elevate your security** - Advanced threat prevention powered by AI-based analytics, leveraging big data threat intelligence aggregated from hundreds of millions of sensors.
- **One solution** - Prevent, monitor, detect, investigate, and remediate attacks.
- **Use a single MDR/MPR service** for your entire IT infrastructure, whether secured by the Check Point security stack or other security vendors.
- **Complete security orchestration** to ensure full analysis, response, and remediation across your environment.
- **An intuitive web portal** provides complete transparency to the service activity with a detailed view of all incidents, threat analysis, and security recommendations.
- **Quickly onboard** to the service with simple integration to your existing security stack and ecosystem.
- **Lower SOC investment and overhead:** Eliminate tools purchasing, integration, recruiting, training, and staffing.

ThreatCloud: AI Powered Advanced Threat Prevention

Horizon MDR/MPR Leverages the Power of ThreatCloud

Real-time threat intelligence derived from hundreds of millions of sensors worldwide, enriched with AI-based engines and exclusive research data from the Check Point Research Team.

Operational Peace of Mind

Avoid SOC overhead with simple, responsive, and transparent security operations as-a-service:

- Avoid the overhead of recruiting and training in-house analysts and staffing 24x7x365 shifts with a highly experienced security operations team as-a-service.
- Gain complete transparency to the service activity with an intuitive web portal providing a detailed view of all incidents, threat analysis, and security recommendations mapped to the NIST framework.
- 24x7x365 responsiveness - consult with our analysts with global coverage and language support via chat with an expert, email, phone, and customer portal.
- Use a single MDR/MPR service for your entire IT infrastructure, whether secured by the Check Point security stack or other security vendors.
- Quickly onboard to the service with simple integration to your existing security stack and ecosystem.

Complete transparency

Intuitive web portal providing a detailed view of all incidents, threat analysis, and security recommendations.
