

ITogether Service Definition Document – Check Point FWaaS

Detailed Description
ITogether's Check Point Firewall as a Service (FWaaS) provides robust, cloud-based firewall protection, designed to secure business networks from external and internal threats. This service leverages Check Point's advanced security technology to offer a comprehensive, scalable, and cost-effective solution for protecting enterprise data and systems.

Business Benefits
• Advanced Threat Prevention: Uses Check Point's threat intelligence to detect and block attacks. • Integrated Intrusion Prevention System (IPS): Monitors network traffic to prevent vulnerability exploits. • Real-Time Monitoring and Alerts: Offers up-to-the-minute insights on network security status. • VPN Connectivity: Supports secure remote access for distributed teams. • Automatic Security Updates: Ensures the firewall operates with the latest security patches.

Standard Service Components
• Enhanced Network Security: Protect corporate networks from unauthorized access and cyber threats. • Compliance and Governance: Help organisations meet compliance requirements with built-in security controls. • Operational Efficiency: Reduce the complexity of managing on-premises security hardware. • FWaaS Implementation: Deployment of Check Point firewall solutions tailored to customer specifications. • Regular Security Assessments: Periodic reviews of security posture and threat detection capabilities. • Customised Reporting: Delivery of detailed security and usage reports to stakeholders.

Optional Service Components
To be discussed during scoping exercise.
