

Programme Strategy and Delivery

Helping you shape and deliver complex programmes with expertise and confidence.

Clear programme strategy underpins successful transformation – but aligning vision, priorities, funding, and delivery at scale is a challenge.

Avenue3's gives you access to experienced programme strategists and delivery leaders, helping you shape direction, make informed trade offs, and steer complex programmes with confidence.

What you get...

Strategic direction

Clear articulation of programme intent, outcomes, and success measures.

Operating model design

Definition of roles, responsibilities, governance, and decision making structures.

Portfolio alignment

Ensuring programmes align to organisational strategy, priorities, and capacity.

Delivery strategy

Choosing the right delivery approaches, phasing, and investment profile.

Assurance and decision support

Independent challenge and insight to support confident executive decisions.

Strategic roadmap

A clear, actionable route from strategy through to delivery and benefits realisation.

Everything we produce is practical, presentation-ready and created collaboratively to ensure buy-in.

Pricing

Pricing & timeline: Requirements dependant*

* Based on the specific challenges and goals of the organisation.

About us

Avenue3 is the trusted technology partner for NHS and healthcare providers who want to take control of their data and build digital services that truly serve clinicians and patients. We specialise in openEHR, open data architecture, and digital strategies that support long-term flexibility, interoperability, and innovation.

Why Avenue3?

- Proven experts in openEHR and open data architecture
- Deep NHS experience with real-world, scalable solutions
- Trusted advisors with national programme assurance experience
- Agile, efficient, and ready to collaborate at pace with purpose
- Committed to open standards and sustainable digital transformation

We believe that when data is open and unlocked from proprietary systems, care improves, systems evolve, and organisations ultimately thrive.
