

inploi pricing note

The price of the inploi platform is determined on a case by case basis, considering various factors including but not limited to: the size of an employer, the configuration of products and services required, the volume of hires made per year, the number of LLM credits consumed, amongst other variables. This will be scoped together with you in solution design.

For general guidance on pricing for the platform prospects should consult the table below to determine a ball park figure.
