

G-Cloud 15 Pricing Guide

Version: 1.0

Date: January 2026

Classification: PUBLIC

Pricing overview

This pricing schedule sets out the standard pricing for FMIS modules available through the G-Cloud framework. All prices are provided in pounds sterling (GBP) and exclude VAT.

Pricing is structured to provide transparency and flexibility, based on the modules selected, number of licensed users, hosting requirements and any required professional services.

Software licensing

- Software licences are provided under an **annual licence**.
- The annual licence includes:
 - Annual support and maintenance
 - General updates and upgrades
- Licences are issued on a **named user** basis.
- Discounted licence costs are available for six or more licences, as indicated in the table.
- An **Additional Company Licence** applies where the service is deployed for more than one legal entity or company within the same customer organisation.

Consultancy and professional services

- Professional services are provided on a time and materials basis.
- The **FMIS standard consultancy day rate** is 950 per day.
- Indicative setup days shown in the table are provided as a guide only and may vary depending on scope, data complexity and customer requirements.
- A **high-volume surcharge may apply** where asset volumes exceed 10,000 assets.

Hosting

- FMIS Cloud Hosting is charged annually and priced by asset or SKU volume.
- Hosting includes the managed infrastructure required to operate the service.
- Pricing for asset volumes above 5,000 assets or SKUs is provided on request, based on requirements.

General notes

- All prices are correct at the time of publication and may be revised in line with G-Cloud pricing rules.
- Any quotation provided by FMIS is subject to written confirmation and the applicable Order Form and Licence Agreement.
- Professional services, bespoke development and optional modules are not included unless explicitly stated.

Annual cost		
< 1,000 Asset/SKUs	> 1,000 Asset/SKUs	> 5,000 Asset/SKUs
1200	1,800	Incremental pricing based on requirements

Notes and assumptions

* Discounted licences

Discounted licence pricing applies where six or more user licences are purchased at the point of initial order. Licences may be purchased in increments of one, subject to any applicable minimum licence requirements.

** Additional Company Licence

An Additional Company Licence applies where the service is configured for more than one legal entity or company within the same customer organisation.

*** Set-up days

Set-up days are indicative and provided as a guide only. They represent an estimated level of effort based on a standard deployment, including configuration, data migration support, remote training and onboarding activities. Actual effort may vary depending on scope, data complexity, number of entities and customer requirements.

High-volume usage

Where asset volumes exceed 10,000 assets, a high-volume surcharge may apply. Any such surcharge will be discussed and agreed in advance.

Hosting volumes

Cloud hosting costs are based on asset or SKU volumes. Pricing for volumes above 5,000 assets or SKUs is provided on request and calculated based on requirements.
