

Cloud Migration Services

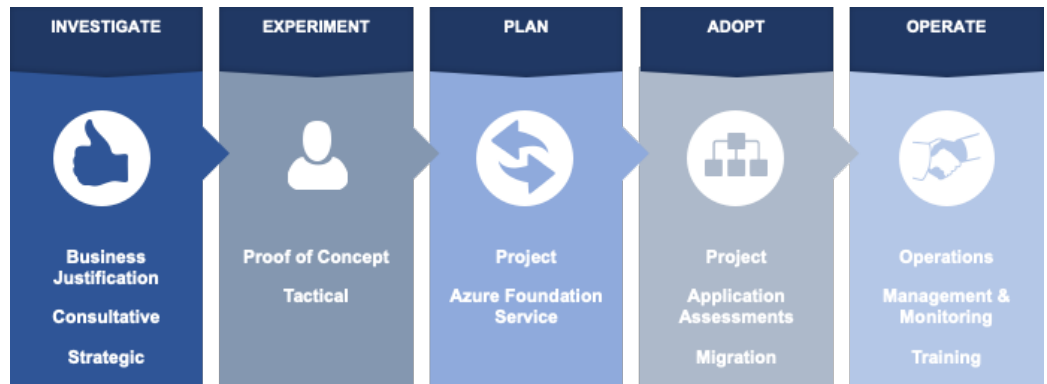

Delivering a Cloud First strategy

Key Benefits

- End-to-end infrastructure and application migration
- Flexible services tailored to meet business need
- Reduce burden on IT operations teams
- Knowledge transfer, enablement, collaboration
- Rapid migration of workloads to Cloud-based digital platforms

The NextGen UX cloud migration service provides expertise for migration of on-prem or other hosted applications to the cloud. The consulting and engineering services provide architecture for design, development and transition management, with overarching design authority capability.

Regardless of where you are in your cloud journey, our comprehensive programme and project delivery capability, ensures that throughout any cloud based setup and migration, we maximise the value for all investment through prioritising activity and ensuring the most effective and efficient delivery methods.

We aim to be a holistic solution to all cloud migration requirements and by putting End User Experience at the heart of what we do, we can ensure that users, regardless of their location, will have the same reliable experience everywhere.

Our consultants provide valuable experience in comprehensive IT engagements, aligned to the business objectives – ranging from strategy and roadmap definitions, enabling business justification for transformation of solutions through to solution delivery and bespoke managed services, allowing the modern IT team to focus on business transformation initiatives, and meeting the ever-expanding computing challenges of today's IT environment.
