|                           |                                                                                                              |                                             |                  |        |
|---------------------------|--------------------------------------------------------------------------------------------------------------|---------------------------------------------|------------------|--------|
|                           |                                                                                                              |                                             |                  |        |
| Chrome Enterprise Premium | Advanced security including Data Loss Prevention (DLP), Deep Scanning for malware, and Context-Aware Access. | \$14,000 USD<br>Total Contract Value (TCV)* | Per User / Month | \$6.00 |

## 2. Service Specific Commercial Terms

### Chrome Enterprise Core

- **Chrome Enterprise Core Limits:** This tier is available at no cost for an unlimited number of browsers, but is restricted to 10 administrative users per organization for email-verified or domain-verified accounts. Larger administrative requirements necessitate a paid subscription.

### Chrome Enterprise Premium

- **Base Currency & Billing:** The 'Chrome Enterprise Premium Service' is a USD-only Service. Regardless of the customer's location, the order form must be quoted in USD (\$6.00). The customer will be billed in the currency associated with their specific Google Cloud Platform (GCP) Billing Account ID.
- **\*Minimum Total Contract Value (TCV):** For partner-led contracts (non-self-service), a minimum TCV of \$14,000 USD applies to the entire life of the contract. This minimum applies even if the contract spans multiple years

## 3. Onboarding and Implementation Fees

Onboarding and initial setup support for these licenses is provided at no additional cost (£0.00)

## 4. VAT and Currency Statement

All prices listed are exclusive of VAT.
