

Kyndryl Vulnerability Management Managed Services

A continuous, proactive approach to vulnerability management is key to preventing cyberattacks and breaches. Kyndryl's Vulnerability Management Managed Services help organizations avoid costly breaches by closing the gap faster with more intelligence than ever before. Kyndryl is a global partner with extensive experience helping customers improve and respond to vulnerabilities using a Kyndryl-designed methodology integrated with industry-leading tools to effectively target what matters most. Kyndryl Vulnerability Management Managed Services provides a holistic security view, integrating with industry-leading vulnerability management tools, change management tools, and automated risk prioritization and remediation, with cybersecurity experts to orchestrate the process end-to-end.

Highlights

- Holistic view of the end-to-end vulnerability management lifecycle.
- Support for vulnerability scanning using industry-standard tools.
- Perform vulnerability scanning: discovery, regular, internal, external, authenticated, non-authenticated, and compliance scans.
- Risk-based approach to detect vulnerabilities and orchestrate remediations through automated prioritization of risks.
- Update scanning profiles for automated or manual scanning.
- Standard and custom reports and dashboards to monitor regulatory requirements (compliance scan).

Introduction

Kyndryl Vulnerability Management Managed Services is designed to modernize patch and vulnerability management to decrease response time to threats. By prioritizing threats to mitigate risks and improve business continuity, we deliver a rapid and effective response. Using a Zero Trust lens, cybersecurity best practices, and advanced technologies, our teams of experts can help you defend against risk, protect your business-critical applications and data, and reduce the probability of breaches or disruptions.

Kyndryl's solution is a single repository, operating seamlessly with built-in integrations to improve execution and measure success, that focuses on:

1. Improving data visibility, ensuring asset information is correct, and centralizing vulnerability information.
2. Driving risk identification, prioritization, validation, asset alignment, and remediation assignment.
3. Reduce execution timeframes using automation or manual to resolve vulnerabilities quickly, validating the remediation, performing risk and exception tracking, and developing automation to speed up the time required during maintenance windows.

Kyndryl Vulnerability Management Managed Services

Kyndryl Vulnerability Management Managed Services is designed to provide holistic support for an end-to-end vulnerability management lifecycle. Options range from advisory and implementation to a full end-to-end managed service through a risk-based approach to detect vulnerabilities and orchestrate their remediation.

Capabilities

- Assessment and discovery
- Regular and compliance scans with industry-standard tools
- Identification and automated prioritization of risks supported by industry-standard tools.
- Vulnerability remediation orchestration
- Standard and custom reporting with metrics and dashboards
- Customer IT Service Management (ITSM) takeover as applicable
- 8x5 support

Competitive Differentiators

Kyndryl's Vulnerability Management Managed Services enhances an organization's current vulnerability management process to the desired level. It minimizes the occurrence and impact of future cyber threats.

Kyndryl's service includes:

- Vulnerability management methodology and risk-based delivery model with a Zero Trust lens.
- Broad view of the threat landscape across multiple business sectors.
- Integrated service management across supported platforms.
- Ability to serve customers in complex, highly regulated industries.
- Experience with 1600 customers using our manual patching solutions and internally, spanning more than 60 countries.

Why Kyndryl?

According to ISC2, there is a critical gap of 4 million cybersecurity professionals worldwide.¹

At Kyndryl, we understand the pros and cons of various cybersecurity strategy options and can help you navigate and select a strategy that is most capable of meeting your requirements and assumptions.

Experience

Execute faster by leveraging the extensive skills and resources across Kyndryl and our broad partner ecosystem.

Technology

Securely integrate emerging technologies across hybrid environments, benefiting from our decades of experience and patterns of success.

Support

Manage the rapidly evolving operational risks, effectively protect business-critical infrastructure, and mitigate the business impact of security vulnerabilities.
