

Accelerate digital transformation using Kyndryl Advisory, Implementation, Migration and Modernization Services on Google Cloud

Client challenge

Most businesses have moved the simple workloads to cloud. Now it's time to modernize and migrate the complex mission critical workloads, enhancing them with intelligent data to truly achieve digital transformation.

Making this move is not easy however, as most customers need help due to lack of in-house skills and experience.

Reducing risk in terms of potential downtime, performance issues, or decreased end-user productivity is essential.

Kyndryl® and Google Cloud™ have teamed together to help customers address these challenges with application migration and modernization solution enhanced with ERP, data modernization and AI on Google Cloud.

Solution features

- 1 Proven tools and processes for successful migrations
- 2 Modular, flexible, predictable pay-as-you-go cost model
- 3 Secured, factory-based delivery model, and mass volume migration

How Kyndryl can help

Tools and processes

Discovery activities are executed for customer's on-premises infrastructure including workload assessment using Google Cloud Adoption Framework

Third-party discovery tools for full understanding of application dependency mapping.

Monitoring determines application and network behavior and performance prior to executing a migration.

Expertise

Kyndryl and Google Cloud share their deep experience in working with customers to deliver enterprise-grade workload analysis, migration, implementation, and managed services for the most complex workloads.

Our partnership has a rich history of delivering customer-centric innovation, aimed at evolving and sustaining the world's most vital IT systems.

Kyndryl and Google Cloud have the people, processes, and technology to help organizations progress their digital transformation journey using intelligent data and AI-driven insight.

People and processes

Kyndryl's global team of Google Cloud-certified experts establish which workloads are best matched to Google Cloud capabilities.

Workload placement plan, customer pre-requisites, and necessary tasks are reviewed with the customer.

Pre-migration performance assessment of the infrastructure, applications, and network helps identify any issues, such as software coding.

Why Kyndryl?

Kyndryl works at the core of businesses that move the world. With nearly 90,000 skilled professionals operating in over 100 countries, we design, build, manage, and modernize the mission-critical technology systems that the world depends on every day. Working together with Google Cloud and our customers, we co-create solutions to help enterprises reach their peak digital performance.
