

Microsoft Copilot and AI Workshop

Discover the opportunities that AI and Microsoft Copilot can bring your organisation.

Workshop overview

This is a half-day workshop designed to answer your questions and explore where Copilot and AI offerings from Microsoft could enhance productivity within your organisation.

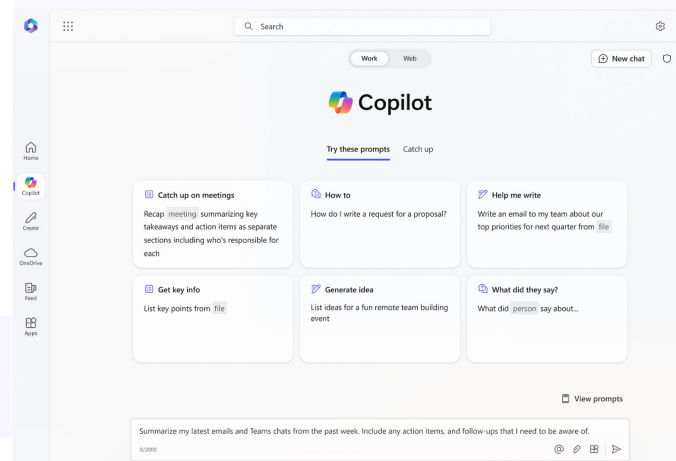

This workshop is ideal if you're interested in Copilot but you have concerns about data and privacy, or you want to understand more about how Copilot will work with your existing setup.

0.5 days

Technical decision makers

What should I expect?

The workshop provides a mix of **education and discussion**.

In the **first half**, we'll bring you up to speed on the Microsoft AI landscape, provide a deep dive on Microsoft 365 Copilot. We will cover related productivity capabilities, such as Microsoft Syntex and SharePoint Agents, and discuss what you need to do to get the most out of Copilot while minimising data risks. We'll demonstrate functionality and use cases, and we'll answer any questions during the session.

In the **second half**, there will be a free-format discussion of how these AI solutions might fit with your current services and infrastructure. We'll explore your technical readiness in more detail, for example by talking through your current approach to file storage, lifecycle management, data protection and governance, and service management. We'll cover any specific areas of interest or concern, and finally we'll discuss what a roadmap to AI adoption looks like for your organisation.

Workshop agenda

- Overview of the **Microsoft AI landscape** and the various Copilot solutions
- Deep dive into **Microsoft 365 Copilot** with demos and use cases
- Key **considerations** around privacy, compliance and security
- How AI solutions could work for your **current setup** and any areas of interest or concern
- Exploration of your **technical readiness**
- Start building out an **AI roadmap** for your organisation

Who is this workshop for?

The workshop is primarily aimed at technical decision makers. To benefit from the workshop, you'll have a broad understanding of your current technology estate, your Microsoft licensing model and your high-level technology goals, together with your data protection and privacy requirements.

By the end of the workshop, you should be inspired by the capabilities of Microsoft 365 Copilot and have a better understanding of what you need to do to securely benefit from it.

Why Microsoft Copilot & AI?

Microsoft Copilot brings the power of next-generation AI to work. By combining the power of Large Language Models (LLM) with your data within the Microsoft Cloud, you can use natural language prompts to enhance your daily work with the benefits of AI. By using Copilot, your organisation can boost productivity, enhance creativity, and save valuable time by automating simple tasks, allowing employees to focus on more important work.

About Chorus

Chorus is one of the leading Microsoft partners in the UK. We're here to inspire, secure and transform your organisation through the innovative use of Microsoft technology, as well as providing ongoing support through our 24x7x365 Service Desk and Cyber Security Operations Centre (CSOC). We offer a unique alternative to traditional IT providers, delivering enterprise-level IT services, but with the agility and personality of a closely trusted partner — giving you the best of both worlds.
