

Microsoft Power Platform– Lot 2b Price Schedule

1) Overview of Service Offering

This Pricing Schedule relates to the provision of **Microsoft Power Apps Premium**, delivered as a Software-as-a-Service (SaaS) offering through the Microsoft Cloud Solution Provider (CSP) New Commerce Experience (NCE). Power Apps Premium enables customers to build, deploy and run low-code applications using Microsoft Dataverse, premium connectors, AI-assisted development, and enterprise-grade governance and security.

This schedule sets out all pricing, optional services, constraints, assumptions, and commercial terms applicable to purchases made under the G-Cloud 15 Framework (Lot 2b: Cloud Software).

2) Pricing Tables (including sub-tables for relevant product categories)

2.1 Core SaaS Licensing

Item	SKU	Description	Unit	Billing Term	Price (ex VAT)	Notes
Power Apps Premium	CFQ7TTC0LH2H	Premium low-code application platform licence. Includes Dataverse, premium connectors, AI-assisted app creation, model-driven apps, and enterprise integration.	Per user	Annual (12 months)	£184.80 per user per year	Equivalent to £15.40/month. Commercial price.

2.2 Optional Service Categories (Priced Separately)

These are **not included** in the base SaaS licence and are purchased separately where required.

Category	Description	Unit	Price
Implementation & Onboarding	Setup, configuration, initial environment preparation	Per engagement	Priced separately
Training (Admin, Maker, End User)	Virtual or on-site training	Per session	Priced separately
Enhanced Support (24/7)	Extended service hours beyond core support	Per month	Priced separately
Migration / Data Services	Extraction, transformation, loading, migration	Per engagement	Priced separately

These are optional and not mandatory for operation of the SaaS platform.

3) Add-Ons & Options

The following add-ons **may** be purchased but are **not required** for baseline Power Apps Premium capability:

Add-On	Description	Included?	Price
Additional Dataverse Capacity (DB/File/Log)	Required only if usage exceeds Microsoft's included baseline	Optional	Priced separately through Microsoft catalogue
Azure Integration Services	For advanced API management or workflows	Optional	Priced separately
Power Automate RPA	Attended/unattended automation	Optional	Priced separately
Custom Development Packages	Tailored application development	Optional	Priced separately

4) Framework Discount

No standard framework discount is applied.

If a customer requires quantity-based or multi-year discounts, these may be considered at Call-Off stage, provided they comply with G-Cloud rules and apply equally to all eligible buyers.

5) Mechanism for Establishing Price

Prices are established using the following rules:

1. **Base subscription price** is taken directly from the Microsoft CSP NCE price list.
2. Pricing is **per user per year**, following Microsoft's standard annual commitment model.
3. Optional services are priced using SCG.WORLD Ltd's day-rate or engagement-rate commercial model.
4. Prices are fixed for the duration of the customer's Call-Off Contract unless subject to a permitted adjustment (see Section 6).

Microsoft upstream price changes are passed through in accordance with G-Cloud change control guidance.

6) Price Certainty & Adjustments

6.1 Fixed Price Commitment

Pricing is fixed for the duration of the Call-Off up to 12 months from commencement.

6.2 Permitted Price Adjustments

Prices may be adjusted under the following conditions only:

- **Upstream Microsoft price adjustments** under CSP/NCE
- **Changes in applicable taxes or levies**
- **Framework-permitted annual price updates** where applicable

No other price changes are permitted.

6.3 No Indexation

Prices are **not** automatically indexed to inflation unless mandated by CCS.

7) Dependencies & Assumptions

The pricing assumes the following:

- The customer has an existing Microsoft 365 tenancy.
- Identity is managed using Azure Active Directory / Entra ID.
- Customer provides appropriate administrative permissions for service enablement.

- Internet connectivity is the customer's responsibility.
- Customer maintains licence compliance throughout the term.
- Optional services (training, onboarding, migration) are not required unless requested.
- Dataverse storage usage remains within Microsoft's included baseline unless add-ons are purchased.

8) Call-Off Schedule 5 Mapping

(Call-Off Schedule 5: Pricing)

This Pricing Schedule aligns with the requirements of Call-Off Schedule 5 through the following mappings:

Schedule 5 Requirement	Pricing Schedule Section
Description of all Charges	Sections 2 & 3
Mechanism for Price Review	Section 6
Optional Services & Related Charges	Section 3
Any Assumptions or Dependencies	Section 7
Any Discount Structures	Section 4
Exit Charges (if applicable)	None (service has no exit charges)

No additional charges apply beyond those explicitly stated.

9) Commercial Terms Impacting Price

The following commercial terms govern pricing:

- **Annual term commitment** per Microsoft CSP NCE model.
- **Licence assignment is per named user**, non-transferable except as permitted by Microsoft.
- **Over-deployment is not permitted**; additional licences must be purchased before overage.
- **Early termination** results in Microsoft's CSP NCE early-termination rules (no cancellation mid-term).
- **Renewal pricing** follows the current Microsoft list price at renewal date.
- Optional SCG.WORLD professional services are governed by separate Statement of Work (SOW).

10) Service Category Mapping

This Pricing Schedule relates to **G-Cloud 15 Lot 2b: Cloud Software** and aligns with the following service capabilities:

G-Cloud Service Category	Mapping Justification
Cloud Software (SaaS)	Power Apps Premium is delivered as SaaS within Microsoft Cloud
Low-Code / Application Development Platforms	Power Apps Premium provides full low-code build/run capabilities
Data Platforms	Includes Dataverse integration and storage
Automation / Integration	Includes premium connectors and AI-assisted app generation
Productivity & Collaboration	Integrates with Microsoft 365 and Dynamics 365 services
