

Data Integration and Intelligence Service - G-Cloud 15 Lot 2b Pricing Schedule

Service Name: Data Integration and Intelligence

Supplier: SCG.WORLD Limited

Lot Classification: Lot 2b – Software as a Service (SaaS)

1) Overview of Service Offering

This Pricing Schedule sets out the subscription, add-on and option-based charges applicable to the Data Integration and Intelligence service. All pricing is based on Microsoft New Commerce Experience (NCE) list prices for the Commercial segment and is expressed exclusive of VAT. Prices are repeatable, transparent and compliant with Crown Commercial Service (CCS) requirements for G-Cloud Lot 2b SaaS services. The service is licensed on a per-user or per-capacity basis depending on the SKU. Consumption-based Azure services are not included in fixed subscription pricing and are procured under separate Azure billing arrangements.

2) Pricing Tables

Pricing tables are organised into categories consistent with the service definition. Each table uses the required G-Cloud structure: **Product | Unit | Billing | Price (ex-VAT)**.

2.1 Core User Licensing

Product	Unit	Billing	Price (ex-VAT)
Power BI Pro	Per User	Annual	£129.60
Power Apps Premium	Per User	Annual	£184.80

2.2 Data Governance & Compliance

Product	Unit	Billing	Price (ex-VAT)
Microsoft Purview Suite	Per User	Annual	£110.40
Microsoft Purview Suite	Per User	Monthly	£11.04
Compliance Manager Premium Assessment Add-On	Per Tenant	Annual	£4,614.00

2.3 Additional Capacity (Azure Consumption – Not Included)

The following capabilities are commonly required but are charged separately via Azure consumption billing and are therefore outside this Pricing Schedule:

- Azure Data Factory compute and pipelines
- Microsoft Fabric capacity
- Synapse pipelines and analytics pools
- Azure Storage (Blob, ADLS)

3) Add-Ons & Options

Optional add-ons may be purchased to extend functionality. These are not required for the base service but provide enhanced governance and compliance capability.

- Compliance Manager Premium Assessment Add-On – annual subscription
- Additional Microsoft Purview capacity – billed monthly or annually
- Optional consultancy or configuration support – day-rate pricing available on request

4) Framework Discount

The supplier does not apply a framework-specific discount. All prices listed are standard Microsoft NCE commercial list prices. Any promotional discounts made available by Microsoft from time to time may be applied at the point of call-off, subject to CCS compliance.

5) Mechanism for Establishing Price

Prices are derived from Microsoft NCE ERP list pricing for the Commercial segment. The unit price is fixed for the duration of the subscription term selected by the Buyer (monthly or annual). The Buyer's total cost is calculated as:

(Unit Price) × (Number of Units) × (Subscription Term)

Where consumption-based Azure services are required, charges are based on Microsoft Azure Pay-As-You-Go or MCA pricing and invoiced separately.

6) Price Certainty & Adjustments

All subscription prices remain fixed for the duration of the term selected. Adjustments may occur only in the following cases:

- Microsoft revises ERP list pricing at renewal
- The Buyer changes the quantity of licences mid-term
- Additional optional add-ons are purchased
- Statutory tax changes (e.g., VAT)

There are no hidden charges, onboarding fees or exit fees associated with this service.

7) Dependencies & Assumptions

The pricing in this schedule assumes:

- Users are licensed within an eligible Microsoft 365 or Azure tenant
- Buyers maintain the required base licensing for Power Platform or Microsoft 365 where applicable
- Azure consumption is billed separately and not included in SaaS subscription pricing
- Prices are based on the Commercial segment; Education and Non-Profit pricing is available upon request

8) Call-Off Schedule 5 Mapping

This Pricing Schedule aligns to Call-Off Schedule 5 by:

- Providing a complete set of unit prices for all licensable components
- Identifying optional components separately
- Stating the price basis, billing model and calculation method
- Ensuring all prices are transparent, fixed for term, and exclusive of VAT

9) Commercial Terms Impacting Price

The following commercial terms may impact the Buyer's final cost:

- Minimum terms set by Microsoft NCE (monthly or annual)
- Early cancellation restrictions linked to NCE subscriptions

- Buyer's choice of billing cycle (monthly vs. annual)
- Optional add-ons or additional capacity purchased during the term

All terms comply with CCS requirements for G-Cloud Lot 2b SaaS services.

10) Service Category Mapping

The pricing provided corresponds to the categories defined in the service offering, including:

- Data Integration and Transformation
- Data Governance and Metadata Management
- Analytics and Reporting
- Optional Compliance Add-Ons

This Pricing Schedule represents the full catalogue of fixed-price subscription components relevant to the Data Integration and Intelligence service.
