Pricing overview

LALAW is a modular software based on the B-SAFE platform by BONDAP. This means each LALAW module, including Court Bundling can work as a standalone module but can be seamlessly integrated with others to provide organisations with one system for solving most challenges.

Price depends on the number of users/licences and the number of modules you select.

Please, refer to [examples](#) of project price calculation for avoidance of doubts.

This pricing document covers Court Bundling only. If you require a more complex solution, please refer to LALAW legal case management system offer.
