Pricing overview

BONDAP e-procurement, digital marketplace and dynamic purchasing system is a modular software based on B-SAFE Platform by BONDAP. This means each module can work as a standalone module but can be seamlessly integrated with others to provide organisations with one system for solving most challenges.

Price depends on the number of users/licences and the number of modules you select.

For complex e-procurement management, we recommend selecting at least the following:

- e-Tendering,
- e-Evaluation,
- e-Contracts Management,
- e-Auction,
- e-Vendor Management
- Spend control
- DPS (Dynamic Purchasing System)
- P2P (Procure To Pay)
- Risks
- Contract Register,
- SLA's
- Prequalified Suppliers
- Documents management

Please, refer to [examples](#) of project price calculation for avoidance of doubts.

Appendix 1. Examples of project price calculation

Example 1.

You have 10 managers that need access to the DPS modules of the system.

You need just standard support during working hours.

You will upload data from your previous systems via csv using built-in import functionality yourself. And you will export data at the end of the contract yourself using built-in export functionality.

You will manage all users accounts in the system (no integration with HR).

You select a 2-years term for the contract and pay in advance for 2 years.

So the pricing schedule will be the following:

Title	quantity	unit price	discount (for 2-years term)	sum
year 1				
instance roll-out (once)	1	5000	-	5000
DPS roll-out (once)	1	3000		3000
user licences (annually)	10	1000	-	10000
year 2				
user licences (annually)	500	100	-	10000
Full Amount to pay:				28000
