DELIVERY GOVERNANCE & ASSURANCE

SERVICE DEFINITION

DELIVERY GOVERNANCE & ASSURANCE

We help public sector organisations run delivery governance that gives leaders confidence in progress, risk and quality, so programmes can make decisions early and avoid late surprises. We provide hands-on governance and assurance support that works across multi-supplier delivery.

SERVICE FEATURES

- Delivery controls pack (RAID, milestones).
- Quality gates and readiness criteria.
- Reporting and MI cadence.
- Assurance findings and remediation backlog.
- Supplier coordination model.
- Governance forums and escalation routes.
- Evidence pack structure.
- Integration with existing tooling.
- Handover documentation.
- Ongoing governance run service.

SERVICE BENEFITS

- Improved visibility of risk and progress.
- Reduced late-stage delivery surprises.
- Clear audit and assurance evidence.
- Better multi-supplier coordination.
- Improved service continuity at release.
- Reduced dependency risk.
- Faster blocker resolution
- Better cost predictability.
- Improved senior reporting confidence.
- Stronger quality outcomes.

SUMMARY

- We provide delivery governance and assurance support to help public sector programmes maintain control of risk, progress and quality across complex delivery landscapes.
- A Starter phase is used to establish the governance rhythm, controls and reporting, with optional ongoing support through Run to maintain cadence and provide continuous assurance.
- The focus is on practical controls that support delivery decisions, rather than adding overhead.

APPROACH

- Starter to assess current governance and agree a proportionate control approach
- Establish delivery controls including RAID, milestones and dependencies
- Set up reporting pack aligned to stakeholder needs and assurance expectations
- Define quality gates linked to release readiness and evidence capture
- Provide assurance findings and a prioritised remediation backlog
- Optional Run service to maintain governance cadence and improve controls over time

GOVERNANCE

- Governance pack including forums, decision routes and escalation paths
- RAID log with clear ownership, review cadence and mitigation tracking
- Dependency and milestone tracking across suppliers and teams
- Quality gates and acceptance criteria aligned to delivery and operational readiness
- Assurance report with risks, findings and recommended actions
- Evidence pack structure for audits and assurance activity
- Service reporting pack including progress, risks and delivery confidence indicators
- Run (if purchased): MI reporting, service reviews and continuous improvement backlog
