1. Quaylogic Overview

Quaylogic is a specialist consultancy and data / AI / technology management services provider - we help our clients to harness the power of their data.

We pride ourselves on the deep technical and industry expertise our consultants and delivery teams brings every client engagement. We have many years of experience delivering complex data programmes, technology implementations and regulatory driven changes.

Our consultants and delivery teams operate cross-industry and have backgrounds ranging from public sector, financial services, policing and law enforcement, automotive, health, pharmaceuticals and manufacturing. Our strength is being able to provide an end-to-end delivery team that can take our clients from business case and data strategy through into implementation and embedding into BAU.

2. Our Capability

Quaylogic is a specialist data management and technology /AI provider built around seasoned data practitioners that have extensive experience, delivering the data capability our clients need to transform their businesses and operations . We offer a range of services from data strategy to platform design, build and implementation, including DCAM assessments, metrics frameworks and data management target operating model & tooling implementation.

Our Delivery Road-Mapping core offering is built around **3 inter-connected tenants** of Data Management, with a key focus on embedding data & data skills into the fabric of our client's organisations, their ways of working and their people.

Data Strategy & Implementation

Specialist Data Practitioner & Programme Delivery team

Pre-built & pre-configured tooling to support accelerated delivery

Extended Data Usecase Coverage (Data Governance, Data Quality, Data Lineage, Analytics & Reporting)

Data as a Managed Service

Roadmap to transition all (or selected Data Management Modules) onto the Quaylogic Data Management as a Service

Customisable Service Catalogue that covers both the business process portions of the Data Target Operating Model as well as Platform and Tooling

Quaylogic have many **formal Partner & Alliance relationships** with key technology and data management organisations / vendors to support successful road-mapping delivery.

With our Partner & Alliance firms, we play a key role that supports both our clients and the key vendor firms we work with to deliver high value outcomes & business benefits, including:

- Formally vendor trained and certified Quaylogic resources
- Dedicated professional services and implementation support for clients
- Range of Quaylogic Accelerators to reduce implementation timescales, improve BAU operation and control risk
- Input and awareness of product roadmaps & vendor direction

A selection of our partners and alliances are presented below:

Quaylogic recognise the need to **build technology and data skills** into BAU to enable sustainable, internally resourced and effective adoption of data management, data technology platforms and AI across the organisation. In support, **our Q-Academy offering** helps our clients with junior resourced, who are trained and skilled up by Quaylogic ready to deploy for to build sustainable development and operational capability for our clients:

Q-Academy ©

We take our graduates and junior professionals through our dedicated training and mentoring programme to develop to be equipped with the right skills and experience.

We mentor and train our data management and data engineering people to be the skilled and experienced data management professionals of tomorrow.

Our Q-Academy © Team are skilled, energetic and motivated to deliver the right data capability for your organisation.

3. Service Overview

Quaylogic can execute comprehensive delivery road-mapping for your organisation. This delivery road-mapping will include everything from aligning technology and data strategy to business strategy / strategic outcomes through to data strategy, shaping and definition of the required transformation and change delivery and the execution of the build and implementation of the required capability. The service will include road-mapping the delivery of the required target state organisation into the required business as usual (BAU) target operating model. The road-mapping and strategy will outline a range of features to enable business-driven decision making on data and a clear vision of ‘what good looks like’.

Key Features

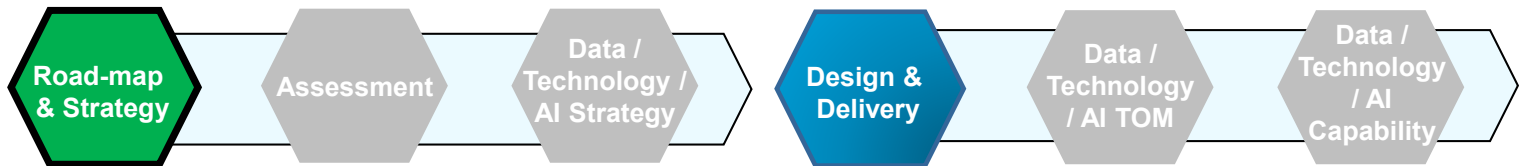

- Road-map definition of data and technology vision, business drivers and data priorities
- Provides a well articulated statement of ‘what good looks like’ through a set of data, AI and technology capabilities and services
- Outlines the target business, data, AI and technology organisation and data management target operating model
- Design of the required data architecture, technology / AI and business architecture
- Design, build and implementation of the data platform and data tooling set
- Road-map definition across data ingestion / data storage / data transformation / data profiling / data exploitation / advanced analytics / business intelligence

Key Benefits

- Directly aligns road-map and strategy with business value and return on investment (ROI)
- Delivers an agreed & socialised set of deliverables to enable business-driven decision making on data and technology
- Articulates the future state data capability & organisation internally and externally along with a clear vision of ‘what good looks like
- Effective platforms to harness and operationalise the exploitation of data
- Alignment and delivery value across people, processes, technology and data
- Underpins and supports effective data, technology and AI exploitation
- Drives the right priorities across the business, data and IT teams

4. Service Description

Quaylogic Road-mapping delivery and data strategy services form part of the journey to define, build, implement and adopt Data, Technology and AI Management across the organisation:

At a detailed level the Data Strategy and Roadmap deliverables provide a single, agreed and socialised vision for the organisation:

- **Data / Technology / AI Road-map & Strategy** definition
- Outline shaping of the **Data / Technology / AI Business Case**
- Outline shaping of **Data / Technology / AI Change Programme and mobilisation** tasks
- Outline shaping of high-level Data Target Operating Model
- Data / Technology / AI **Transformation Delivery** – people / process / technology
