1. Quaylogic Overview

Quaylogic is a specialist consultancy and data / AI / technology management services provider - we help our clients to harness the power of their data.

We pride ourselves on the deep technical and industry expertise our consultants and delivery teams brings every client engagement. We have many years of experience delivering complex data programmes, technology implementations and regulatory driven changes.

Our consultants and delivery teams operate cross-industry and have backgrounds ranging from public sector, financial services, policing and law enforcement, automotive, health, pharmaceuticals and manufacturing. Our strength is being able to provide an end-to-end delivery team that can take our clients from business case and data strategy through into implementation and embedding into BAU.

2. Our Capability

Quaylogic is a specialist data management and technology /AI provider built around seasoned data practitioners that have extensive experience, delivering the data capability our clients need to transform their businesses and operations. We offer a range of services from data strategy to platform design, build and implementation, including DCAM assessments, metrics frameworks and data management target operating model & tooling implementation.

Our Delivery Road-Mapping core offering is built around **3 inter-connected tenants** of Data Management, with a key focus on embedding data & data skills into the fabric of our client's organisations, their ways of working and their people.

Data Strategy & Implementation

Specialist Data Practitioner & Programme Delivery team

Data **Strategy** definition & EDM Council DCAM Maturity Assessment

Data Management Platform & Tooling

Data Platform Design / Build / Implementation delivery across Data Ingestion / Data Storage / Data Transformation / Data Profiling / Data Exploitation / Advanced Analytics / Business Intelligence

Formal **Partner relationships** with the key Data Platform & Data Management Tooling vendors

Pre-built & pre-configured tooling to support accelerated delivery

Extended Data Usecase Coverage (Data Governance, Data Quality, Data Lineage, Analytics & Reporting)

Data as a Managed Service

Roadmap to transition all (or selected Data Management Modules) onto the Quaylogic Data Management as a Service

Customisable Service Catalogue that covers both the business process portions of the Data Target Operating Model as well as Platform and Tooling

Quaylogic have many **formal Partner & Alliance relationships** with key technology and data management organisations / vendors to support successful road-mapping delivery.

With our Partner & Alliance firms, we play a key role that supports both our clients and the key vendor firms we work with to deliver high value outcomes & business benefits, including:

- Formally vendor trained and certified Quaylogic resources
- Dedicated professional services and implementation support for clients
- Range of Quaylogic Accelerators to reduce implementation timescales, improve BAU operation and control risk
- Input and awareness of product roadmaps & vendor direction

A selection of our partners and alliances are presented below:

Quaylogic recognise the need to **build technology and data skills** into BAU to enable sustainable, internally resourced and effective adoption of data management, data technology platforms and AI across the organisation. In support, **our Q-Academy offering** helps our clients with junior resourced, who are trained and skilled up by Quaylogic ready to deploy for to build sustainable development and operational capability for our clients:

Q-Academy ©

We take our graduates and junior professionals through our dedicated training and mentoring programme to develop to be equipped with the right skills and experience.

We mentor and train our data management and data engineering people to be the skilled and experienced data management professionals of tomorrow.

Our Q-Academy © Team are skilled, energetic and motivated to deliver the right data capability for your organisation.

3. Service Overview

Quaylogic's Managed Cloud Services provide full service flexible delivery capability. We support cross platform technology environments spanning Microsoft (Azure / Fabric), GCP, AWS, IBM Cloud, Oracle Cloud. Our services combine experienced cloud technology resource and talent with innovative technology, enabling you to shift to an adaptive managed cloud capability. Our team is skilled and experienced in the design, build and implementation of private cloud environments. We deliver a client-centric customer focused service approach using our transformation and service management skills, combined with our track-record of managed service operational delivery. We combine our deep data, technology and AI skill sets to provide effective cloud services managed delivery.

Key Features

- Flexible, scalable managed cloud and application management service capability
- Skills and experience in delivering and managing cloud programmes
- Certified and experienced consultants and delivery resource across a range of cloud technologies including Microsoft (Azure / Fabric), GCP, AWS, IBM Cloud, Oracle Cloud
- Customer focus with clear, measurable commitments
- High-quality service delivery underpinned by extensive cloud expertise aligned with recognised standards (e.g. security, resilience, and governance best practice)
- Commitment to continuous service excellence and improvement
- Comprehensive service approach supported by strong service management and project practices
- Collaborative working style / strong focus on service excellence

Key Benefits

- Flexible capacity up or down to match demand
- Cross cloud and application technology platform capability & skilled resource
- Reduces risk through reliable service and transformation delivery
- Keeps delivery focused on your cloud priorities
- Ensures quality through proven delivery processes
- Enables successful cloud and digital transformation
- Provides strategic and technical leadership for cloud transformation & service delivery
- Accelerates delivery and realisation of benefits
- Prepares your organisation and IT for cloud adoption
- Supports collaboration and effective knowledge transfer
- Flexible cloud capability resourcing to meet your demand

4. Service Description

We provide a full end-to-end managed private cloud service set from initial design and build through migration to cloud operations / service delivery and excellence.

At a detailed level the Managed Private Cloud deliverables provide secure, dedicated cloud environments designed to meet public sector requirements:

- **Managed Private Cloud** - Secure, dedicated cloud environments designed to meet public sector requirements
- **Cloud Design & Build** - Design and implementation of scalable, compliant cloud solutions
- **Cloud Migration & Transition** - Structured migration of services and data with minimal risk and disruption
- **Cloud Managed Services** - Ongoing management, monitoring, security, and support of cloud services
- **Cloud Service Delivery** - Delivery of reliable services aligned to agreed service levels
- **Cloud Delivery Excellence** - Continuous improvement, optimisation, and effective service governance

Managed Private Cloud

A dedicated cloud and application environment just for your organisation, fully managed by a provider for security, control, and compliance.

Cloud Design & Build

Design and creating your cloud and application architecture — choosing platforms, designing systems, and setting everything up

properly. We build and implement the cloud solution to meet your needs with our cross-platform capability.

Cloud Migration & Transition

Moving applications, data, and systems from on-premise (or another cloud) into the new cloud environment with minimal disruption.

Cloud Managed Services

Ongoing day-to-day management of your cloud and application: monitoring, updates, security, backups, performance, and support.

Cloud Service Delivery

Making sure cloud services are delivered reliably to users — focusing on availability, responsiveness, and meeting service levels.

Cloud Delivery Excellence

Continuous improvement of cloud and application operations — optimising costs, improving performance, strengthening governance, and adopting best practices.
