1. Quaylogic Overview

Quaylogic is a specialist consultancy and data / AI / technology management services provider - we help our clients to harness the power of their data.

We pride ourselves on the deep technical and industry expertise our consultants and delivery teams brings every client engagement. We have many years of experience delivering complex data programmes, technology implementations and regulatory driven changes.

Our consultants and delivery teams operate cross-industry and have backgrounds ranging from public sector, financial services, policing and law enforcement, automotive, health, pharmaceuticals and manufacturing. Our strength is being able to provide an end-to-end delivery team that can take our clients from business case and data strategy through into implementation and embedding into BAU.

2. Our Capability

Quaylogic is a specialist data management and technology provider built around seasoned data practitioners that have extensive experience, delivering the data capability our clients need to transform their businesses and operations . We offer a range of services from data strategy to platform design, build and implementation, including DCAM assessments, metrics frameworks and data management target operating model & tooling implementation.

Our Delivery Road-Mapping core offering is built around **3 inter-connected tenants** of Data Management, with a key focus on embedding data & data skills into the fabric of our client's organisations, their ways of working and their people.

Data Strategy & Implementation

Specialist Data Practitioner & Programme Delivery team

Data **Strategy** definition & EDM Council DCAM Maturity Assessment

Modular design and implementation of **Data Target Operating Model** (Governance, Quality, Architecture, Privacy, Analytics, Data Engineering, Data Repository / Transformation / Development / Provisioning Platform)

Data **Training, Culture and Learning** design & deployment

Stakeholder management across Transformation / Change Delivery, Business Units and executive Stakeholders

Data Management Platform & Tooling

Data Platform Design / Build / Implementation delivery across Data Ingestion / Data Storage / Data Transformation / Data Profiling / Data Exploitation / Advanced Analytics / Business Intelligence

Formal **Partner relationships** with the key Data Platform & Data Management Tooling vendors

Pre-built & pre-configured tooling to support accelerated delivery

Extended Data Usecase Coverage (Data Governance, Data Quality, Data Lineage, Analytics & Reporting)

Data as a Managed Service

Roadmap to transition all (or selected Data Management Modules) onto the Quaylogic Data Management as a Service

Customisable Service Catalogue that covers both the business process portions of the Data Target Operating Model as well as Platform and Tooling

Quaylogic have many **formal Partner & Alliance relationships** with key technology and data management organisations / vendors to support successful road-mapping delivery.

With our Partner & Alliance firms, we play a key role that supports both our clients and the key vendor firms we work with to deliver high value outcomes & business benefits, including:

- Formally vendor trained and certified Quaylogic resources
- Dedicated professional services and implementation support for clients
- Range of Quaylogic Accelerators to reduce implementation timescales, improve BAU operation and control risk
- Input and awareness of product roadmaps & vendor direction

A selection of our partners and alliances are presented below:

Quaylogic recognise the need to **build technology and data skills** into BAU to enable sustainable, internally resourced and effective adoption of data management, data technology platforms and AI across the organisation. In support, **our Q-Academy offering** helps our clients with junior resourced, who are trained and skilled up by Quaylogic ready to deploy for to build sustainable development and operational capability for our clients:

Q-Academy ©

We take our graduates and junior professionals through our dedicated training and mentoring programme to develop to be equipped with the right skills and experience.

We mentor and train our data management and data engineering people to be the skilled and experienced data management professionals of tomorrow.

Our Q-Academy © Team are skilled, energetic and motivated to deliver the right data capability for your organisation.

3. Service Overview

Quaylogic can execute a comprehensive range of Enterprise and Data Architecture services for your organisation. The Architecture capability we offer includes everything from strategy, technology & data alignment, target state mapping, vendor assessment, technical design capture and a clear mapping to business strategy / requirements. The service includes the delivery of the required target state organisation (resources, training and learning paths) into the required business as usual (BAU) target operating model. The Enterprise and Data Architecture service will outline a range of features to enable business-driven decision making and a clear vision of ‘what good looks like’.

Key Features

- Enterprise and Data Architecture strategy and road mapping
- Strategic options analysis, scoping and definition
- Target state Enterprise and Data Architecture design statement and management
- Design and implementation of Enterprise and Data Architecture policies, standards, guiderails and supporting training & skills development
- Technology, data management and security vendor alignment
- Enterprise and Data Architecture security strategy design, implementation and risk management
- Definition and operation of the Enterprise and Data Architecture target state organisation, including the Quaylogic Managed Service proposition

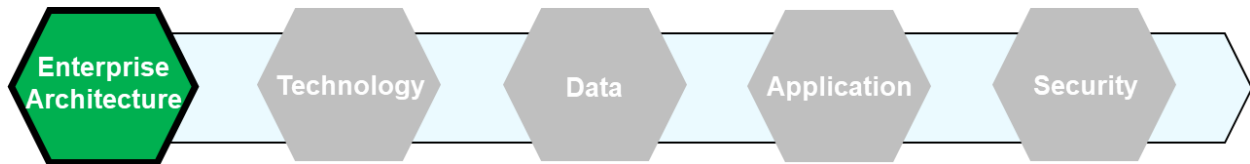

- Provides a well articulated statement of ‘what good looks like’ through a set of Enterprise and Data Architecture capabilities and services

Key Benefits

- Builds a well thought out Enterprise and Data Architecture strategy, roadmap and implementation strategy
- Clearly defines the target state organisation, policies, standards and guiderails needed for success
- Implements & operates key capabilities around Architecture covering Data, Application, Technology and Security
- Implements & operates specialist capabilities into BAU such as enterprise and solution data modelling
- Delivers an agreed & socialised set of deliverables to enable business-driven decision making on data and technology
- Articulates the future state capability & organisation internally and externally along with a clear vision of ‘what good looks like
- Alignment and delivery value across people, processes, technology and data
- Underpins and supports effective AI exploitation

4. Service Description

Quaylogic Enterprise and Data Architecture services form part of the journey to define, build, implement and adopt effective Technology, Data, Applications and Security across the organisation:

At a detailed level the Enterprise and Data Architecture deliverables provide a single, agreed and socialised vision for the organisation:

- Defined Enterprise Architecture Target State, Roadmap and Implementation plan
- Defined target operating model, policies, standards, guiderails and training solution
- Alignment of Technology, Data and Security vendors & solutions
- Operation of all Enterprise Architecture capabilities as Quaylogic Managed Services (including specialist capabilities such as Enterprise & Application Data Modelling)
