4 – Commercial Statement

The pricing in this document is provided for framework listing purposes.

SFIA day rates are maximum chargeable rates; the rates applied at call-off will be agreed with the Customer based on the required scope, duration, delivery model and resource mix.

IaaS components are consumption-based and charged in line with the applicable cloud service provider pricing and the Customer's agreed commercial terms at the time of call-off. As cloud provider prices and service definitions may change over time, final IaaS pricing will be confirmed and documented within each call-off agreement.

Servita's management, optimisation and support services are priced separately (for example via SFIA day rates or an agreed managed service charge) and are not embedded within cloud consumption charges unless explicitly stated in the call-off.
