

Cyber Security

SERVICE DOCUMENT

Service Description

Cymbalstream, offers comprehensive cybersecurity services to protect organizations against modern cyber threats. We offer a range of security solutions, including Managed Detection and Response (MDR), Cloud Detection and Response (CDR), and other advanced cybersecurity services.

Cymbalstream leverages cutting-edge technologies, threat intelligence, and expert security analysts to deliver 24/7 monitoring, detection, and response capabilities across an organization's entire IT infrastructure, including on-premises, cloud, and hybrid environments.

Service Features

- 24/7 Security Operations Centre (SOC) staffed by certified security analysts
- Threat hunting and proactive threat detection across networks, endpoints, and clouds
- Security Information and Event Management (SIEM) technology
- Integration with existing security tools and platforms
- Automated threat containment and response actions
- Customizable detection rules and analytics
- Comprehensive reporting and dashboards
- Vulnerability management and user behaviour analytics
- Cloud security monitoring and protection (CDR)
- Incident investigation and forensic analysis capabilities

Service Benefits

- Improved threat detection and response across the entire IT environment
- Access to specialised cybersecurity expertise and threat intelligence
- Reduced risk of successful cyber attacks, data breaches, and security incidents
- Ability to focus internal resources on strategic initiatives
- Cost-effective alternative to building an in-house security team
- Compliance with industry regulations and security standards
- Enhanced visibility and control over security operations
- Scalable and flexible security solution for evolving business needs

By partnering with Cymbalstream and leveraging our comprehensive cybersecurity services, organisations can effectively secure their IT infrastructure, detect and respond to threats in real-time, and optimise their security operations and investments.
