

Property Utility Revenue Engine (PURE)

Introducing PURE, the revolutionary Salesforce-built solution designed to empower local government organisations and strengthen the communities they serve. Harnessing the latest in autonomous intelligence and revenue management technology, PURE delivers seamless data integration and sophisticated billing and regulatory management capabilities. With Salesforce at its core, it seamlessly integrates with existing systems, providing real-time data insights for informed, data-driven decision-making. From managing citizen account history to facilitating property transactions, PURE streamlines workflows, simplifies requests and searches, and enables organisations to stay ahead of industry standards. Spend more time focusing on impactful projects and less time on tedious administration. Discover the power of PURE and transform the way you manage your local government.

Automate Approval Workflows

Automate approval workflows and benefit from a more efficient and reliable system, freeing up your team's time for more important tasks.

Receive Payments Faster

By creating a seamless and automated billing system, you can trust that your invoices are being issued and paid more efficiently than ever.

Improve Invoice Accuracy

Using invoice automation, take the manual labour out of invoicing. Streamline the entire process while removing extra work and human error.

Ensure Accurate Reporting

With a platform that gives you a single point of truth across all of your data, you can have confidence in your reporting.

Reduce Customer Disputes

Automated invoices remove the element of human error, giving you the accuracy required to keep customer disputes to a minimum.

Manage Billing Needs

PURE is tailored for a mix of different billing needs, whether you are dealing with subscription-based contracts, products, or services.
