

G CLOUD 15 - PRICING SCHEDULE

AZZIDO CLOUD

Real-Time Information Network

WHAT IS AZZIDO CLOUD?

Azzido Cloud is Blackbox's SaaS-based, cloud-native platform for managing real-time information, operational workflows, and targeted communications across multi-modal transport and public environments.

Built on Microsoft Azure, Azzido Cloud delivers the resilience, scalability, and security required for mission-critical operations, while remaining flexible enough to adapt to evolving passenger, customer, and operational requirements.

The physical world runs on information. When that information is late, unclear, or unreliable, trust erodes and operational performance is impacted. Blackbox exists to address this challenge at scale.

Azzido Cloud enables trusted, real-time information networks across complex physical environments - where estates are large, conditions change rapidly, and information flows are mission critical. Information is delivered to the right place, at the right time, enabling operators and customers to make informed decisions with confidence.

APPLICATIONS AND SUBSCRIPTIONS

At the heart of Azzido is a suite of role-based applications and device subscription services, giving operators real-time visibility and control of services, cloud-connected assets, and performance insight across their estate.

AZZIDO CLOUD
Real-Time Information Network

AZZIDO CORE
Ingest & Orchestrate

AZZIDO EDGE
For Hardware Channels

Azzido Cloud is the application layer of the Azzido platform, providing secure, cloud-hosted tools for managing, orchestrating, and delivering real-time information across distributed networks.

Azzido Core is the intelligence and orchestration layer that ingests live data, applies business rules, and coordinates trusted, real-time passenger information across networks

Azzido Edge operates at the point of delivery, securely processing and presenting information on visual and audio channels, ensuring continuity and trusted operation even during disruption.

G CLOUD 15 - PRICING SCHEDULE

Platform access, data orchestration, identity, security, integrations, APIs, governance

Platform components

Module	Description	Qty	Term	Tier 1 Network	Tier 2 Eco System
Azzido Core	Orchestration Layer	1	Annual in Advance	145,000.00	220,000.00

Wayside	Bespoke RT Fleet Integration	1	Annual in Advance	NA	300,000.00
Ambassador	Staff application for local control	1	Tiered (users)	7,500.00	12,000.00

Programme & Onboarding Modules

Module	Description	Qty	Term	Tier 1 Network	Tier 2 Eco System
Discovery	Establish scope and system requirements	1	Programme based	56,000.00	75,000.00
Migration	Enable tenant on Azzido Cloud	1	Programme based	50,000.00	65,000.00
Mobilisation	Programme of delivery.	1	Per Head / Per Day	925.00	925.00

PRICING NOTES

- All prices are correct as of 01 January 2026 and are subject to an annual price review in line with CPI.
- Where a customer requests changes to standard service terms or scope, Blackbox reserves the right to revise pricing to reflect the amended requirements.
- Mobilisation and onboarding costs are indicative and based on a standard delivery model. Bespoke or non-standard delivery may incur additional charges, subject to agreement.
- All prices exclude VAT, which will be charged at the prevailing rate.
- Travel and associated expenses are not included unless explicitly stated.
- All pricing is quoted in GBP (£).

- Tiered pricing is structured around established customer service packages. Pricing may be tailored to reflect variations in scope, scale, budget or operational requirements
